Annex		93
1. Population		1
1.1	Percentage Increases: Census years 1901-1948, 1957, 1967, 1985, 1995 and 2005	3
1.2	End of year population estimates	4
1.3	Maltese population by single years of age, 31st December 2008 (based on the November 2005 Census)	5
1.4	Maltese mid-year population by single years of age, 30th June 2008 (based on the November 2005 Census)	7
1.5	Total Population by single years of age, 31st December 2008 (based on the November 2005 Census)	9
1.6	Total mid-year population by single years of age, 30th June 2008 (based on the November 2005 Census)	11
1.7	Maltese population by region, district and locality: 31st December 2008	13
1.8	Maltese mid-year population by region, district and locality: 30th June 2008	14
1.9	Total population by region, district and locality: 31st December 2008	15
1.10	Total mid-year population by region, district and locality: 30th June 2008	16
1.11	Projected total population: 2009, 2015, 2025, 2035, 2045 and 2050	17
1.12	Projected percentage distribution of total population: 2008, 2015, 2035, 2050	18
2. Births		19
2.1	Total live births by region: 1998-2008	21
2.2	Maltese live births by region: 1998-2008	21
2.3	Number and rate of total live births, by residence of parents: 2008	22
2.4	Number and rate of Maltese live births, by residence of parents: 2008	24
2.5	Total live births by age of mother/father and births outside marriage: 2008	26
2.6	Maltese live births by age of mother/father and births outside marriage: 2008	26
2.7	Total live births by country of citizenship of mother/father and births outside marriage: 2008	27
2.8	Total live births by country of citizenship of mother and father: 2008	28
2.9	Maternities by type and age of mother: 2008	29
2.10	Total maternities by age group of mother and by order of birth: 2008	30
2.11	Total live births by age and economic status/occupation of father: 2008	31
2.12	Monthly incidence of total live births: 1998-2008	32

3. Deaths 33

3.1 Deaths annual review: 1999-2008 35
3.2 Deaths by locality: 2008 36
3.3 Still births, neonatal deaths and infant mortality: 1999-2008 38
3.4 Birth-weight of still births and neonatal deaths: 1999-2008 38
3.5 Deaths by age in completed years at time of death: 1999-2008 39
3.6 Deaths by age in completed years at time of death: 2008 40
3.7 Deaths by age and marital status: 2008 41
3.8 Monthly incidence of deaths: 1998-2008 42
3.9 Deaths by causes: 2002-2008 43
3.10 Causes of deaths of children below 5 years of age: 2008 44
3.11 Deaths by cause: 2008 45
3.12 Deaths by age and economic status/occupation at the time of death: 2008 52
3.13 Abridged life table: 2008 53
3.14 Expectation of life, 1870/72 to 2005 and 2008 54

4. Marriages 55

4.1 Number and rate of registered marriages in Malta and Gozo: 1999-2008 57
4.2 Monthly and quarterly incidence of marriages: 1999-2008 58
4.3 Marriages classified by age and previous marital status of brides and grooms: 2008 59
4.4 Marriages by previous marital status of brides and grooms: 2008 60
4.5 Marriages by age group and economic status/occupation of grooms: 2008 61
4.6 Marriages by age group and economic status/occupation of brides: 2008 62
4.7 Marriages by economic status/occupation of brides and grooms: 2008 63
4.8 Marriages by region and age groups of brides and grooms: 2008 64
4.9 Spouses by country of citizenship and age group: 2008 65
4.10 Spouses previously residing in Malta classified by previous marital status and district: 2008 66
4.11 Spouses previously residing abroad classified by previous country of residence and marital status: 2008 66
4.12 Spouses previously residing in Malta classified by country of citizenship and district: 2008 67
4.13 Spouses previously residing abroad classified by country of citizenship and previous country of residence: 2008 68
4.14 Total marriages classified by country of citizenship of spouses: 2008 69
4.15 Civil marriages classified by age group and country of citizenship of spouses: 2008 70
4.16 Civil marriages classified by country of citizenship of spouses: 2008 71
4.17 Civil marriages by previous marital status of brides and grooms: 2008 71

5. Migration 73

5.1 Major categories of inflows and outflows: 2008 75

5.2 Boats arriving in Malta with irregular immigrants: 2002-2008 75

5.3 Applications filed with the Office of the Commissioner for Refugees: 2002-2008 75

5.4 Asylum applications filed by the Office of the Commissioner for Refugees, by month: 2008 76

5.5 Applications for asylum by citizenship: 2008 76

5.6 Unaccompanied Minors, by country of citizenship: 2008 77

5.7 Asylum decisions taken by the Office of the Commissioner for Refugees: 2008 77

5.8 Positive decisions (Refugee status, subsidiary status or equivalent decisions) made by the Office of the Commissioner for Refugees by citizenship: 2008 78

5.9 Third-country nationals, who were found to be illegally present and who were subject to an obligation to leave and those who actually left Malta: 2008 79

5.10 Third-country nationals, who were found to be illegally present and who were subject to an obligation to leave by country of citizenship and by age: 2008 80

5.11 Migrants residing in Open Centres and other institutional households by locality: December 2008 81

5.12 Migrants in Open Centres: 2008 81

5.13 Open Centre population by country of origin: 2008 82

5.14 Naturalisations and Registrations by nationality and age: 2008 83

6. Miscellaneous 85

6.1 Adoptions by country of origin: 2001-2008 87

6.2 Adoptions by age and country of origin: 2008 88

6.3 Adoptions by residence of adopting parents: 2008 89

6.4 Adoptions by economic status and occupation of adoptive parents: 2008 89

6.5 Registered separations by citizenship of spouses: 2008 90

6.6 Divorces obtained abroad and recognised by Maltese Authorities by country from where divorce was obtained: 2008 90

6.7 Divorces obtained abroad and recognised by Maltese Authorities, by duration of previous marriage: 2008 90

6.8 Registered annulments of marriages by duration and type of marriage: 2008 90

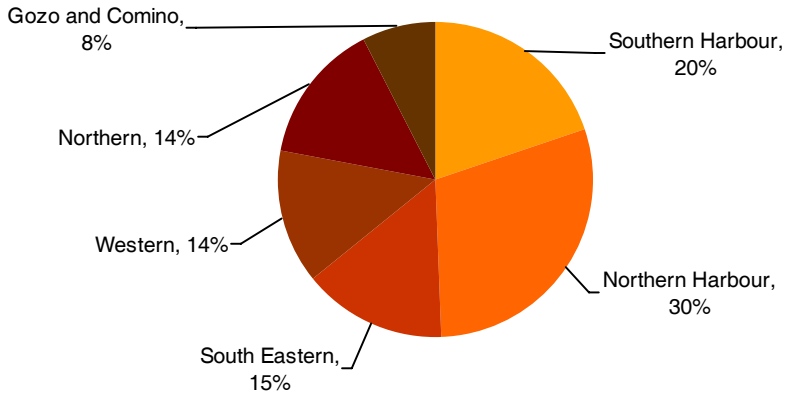
6.9 Crime statistics annual review: 1999-2008 91

1. Population

Over a century, the total population of Malta practically doubled. The total population at the end of 2008, an estimate based on figures obtained from the 2005 Population and Housing Census, amounted to 413,609 persons. 50.2 per cent of these were females. This total comprises all Maltese as well as non-Maltese citizens residing in Malta. The total Maltese population stood at 395,472, implying that the remaining 4.4 per cent were non-Maltese citizens.

21 per cent of the total population comprised children aged less than 18, whilst 14 per cent were 65 and over. The Northern Harbour district remained the largest district in terms of population, with 122,408 residents, or nearly 30 per cent of the total population. This district also encompasses the largest locality in Malta, Birkirkara, with 22,416 residents or 5 per cent of the total population in Malta. Gozo and Comino remained the smallest district, with a population of 31,432 persons.

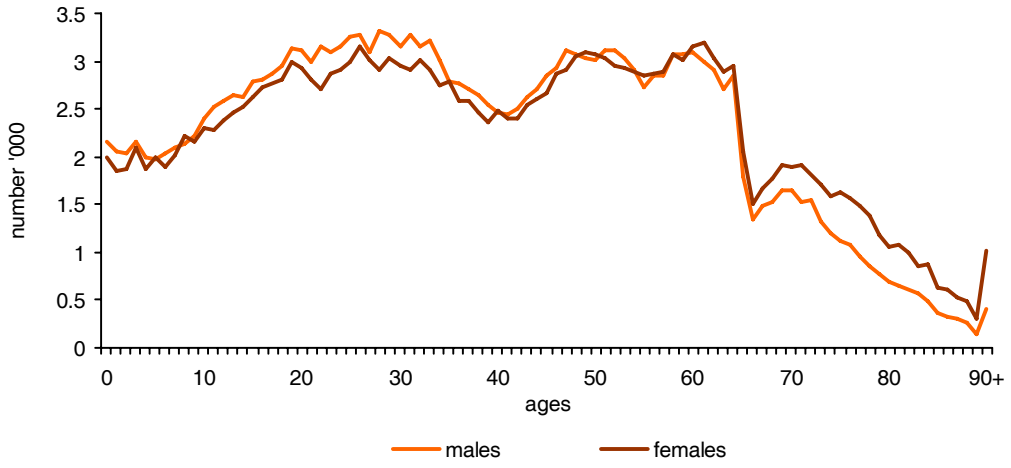
Chart 1. Percentage population by district: 2008



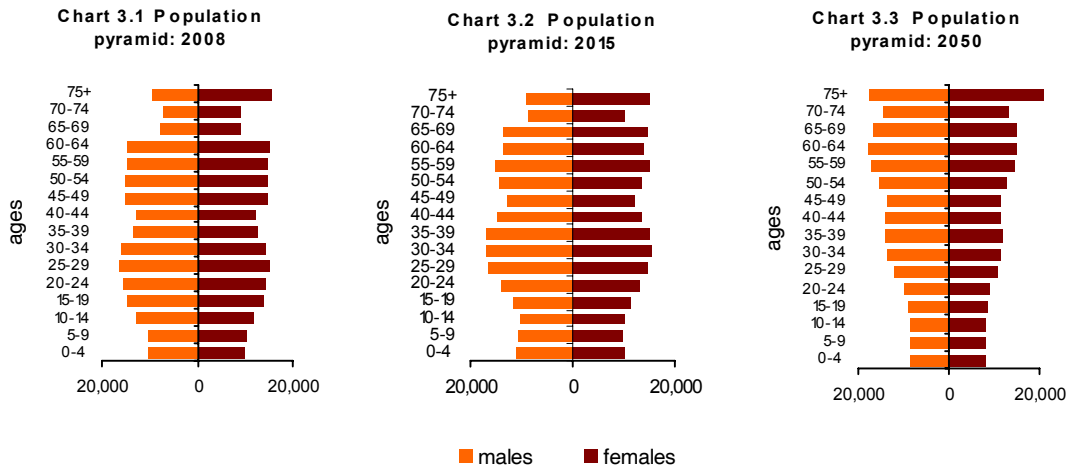
The total population increase over 2007 amounted to 3,319 persons or 0.8 per cent. Population change is the net result of two demographic aspects: the difference between births and deaths and the migration balance. Again, both were positive during 2008 and amounted to 883 and 2,436 respectively. The Maltese population grew by 642 persons or 0.2 per cent with respect to 2007.

The resulting population density in Malta went up to 1,309 persons per square kilometre – an increase of 11 persons per square kilometre when compared to that estimated for the previous year.

Chart 2. Total population by single years of age: 2008



According to NSO projections, the total population is expected to drop to just over 400,000 in 2050, after reaching a peak of 423,000 around 2025. Projections also reveal a continuous ageing population over the years. In fact, the percentage of persons aged 65 and over is expected to increase to 20 per cent in 2025 and then to 24 per cent in 2050. On the other hand, the percentage of persons aged under 20, which was estimated at 22 per cent in 2008, is expected to drop to 19 per cent in 2025 and to 17 per cent in 2050.

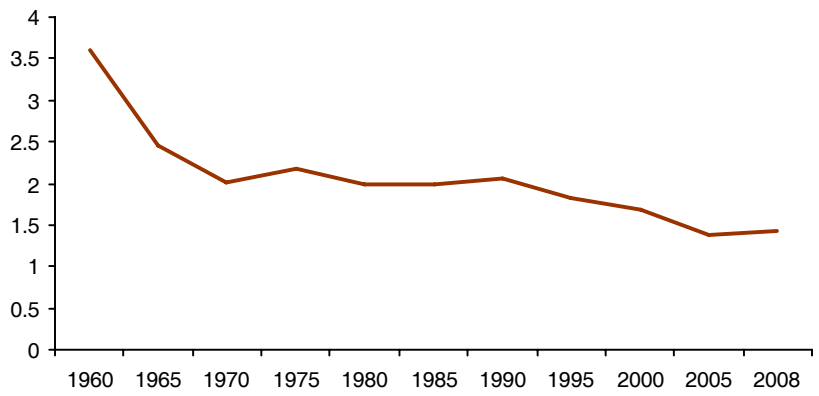


2. Fertility

The total number of births that were registered during 2008 amounted to 4,126. This figure includes all births to Maltese and non-Maltese parents (excluding tourists). There was an increase of 255, or 7 per cent, in the number of babies born with respect to the previous year, bringing the crude birth rate to 10.0 from 9.5 calculated for 2007. Just over 52 per cent were boys.

Nearly 7 per cent of the total number of live births were registered in Gozo, amounting to 297 births. There was an increase of 37 live births in this region, bringing the crude birth rate to 9.5. The increase in the total number of births was reflected in a significant rise in the total fertility rate, from 1.37 in 2007 to 1.43 for the year under review.

Chart 4. Total fertility rates: 1960-2008



Most births pertained to the Northern Harbour district, with 1,155 births occurring to residents in this district. However, the highest crude birth rate was recorded in the South Eastern district and was estimated at 11.4. The second highest crude birth rate was in the Northern district and was estimated at 11.3. Crude birth rates in all other districts equalled 9.5.

During 2008 there were 4,089 maternities. 62 mothers gave birth to twins, whilst two others gave birth to triplets. All these 130 babies were born alive. There were also 29 still births. 52 per cent of all mothers gave birth to their first child. The largest proportion of these mothers (40 per cent) were aged 25-29.

Another 1,388 mothers (33 per cent) were expecting their second child. In this case, the largest proportion (42 per cent) of these mothers were aged 30-34. Interestingly, 47 mothers were experiencing their fifth maternity, while 29 were expecting their sixth child.

When considering all registered live births, 34 per cent of the mothers were aged between 25 and 29, while 31 per cent were between 30 and 34 years old. On the other hand, these two rates for fathers stood at 24 per cent and 35 per cent respectively, indicating that the fathers tended to be older than mothers. There were 47 fathers aged 55 or older.

Chart 5.1 Percentage distribution of births by age of mother: 2008

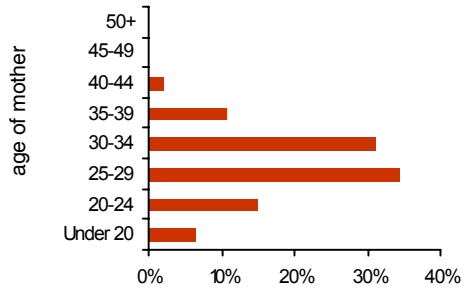


Chart 5.2 Percentage distribution of births by age of father: 2008

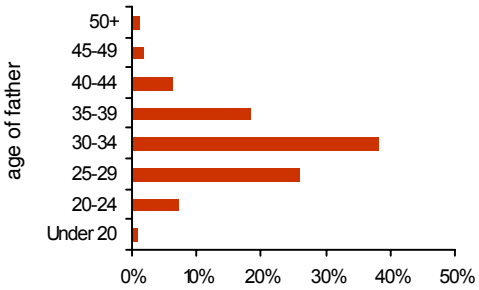

Just over a quarter of all live births occurred outside marriage and numbered 1,048 - an increase of nearly 9 per cent when compared to the previous year. Nearly one-fourth of these mothers were under 20, whilst another 29 per cent were aged 20-24. These two rates stood at 3 per cent and 17 per cent amongst fathers respectively. Of all the births outside wedlock, 352 were registered with unknown paternity. 95 per cent of these mothers were Maltese citizens.

Chart 6.1 Percentage distribution of births outside marriage by age of mother: 2008

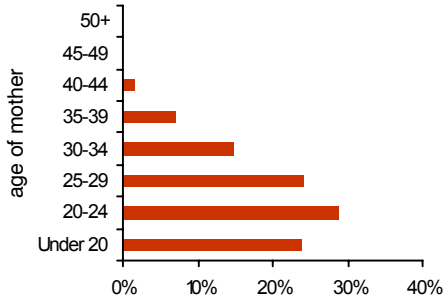

Chart 6.2 Percentage distribution of births outside marriage by age of father: 2008

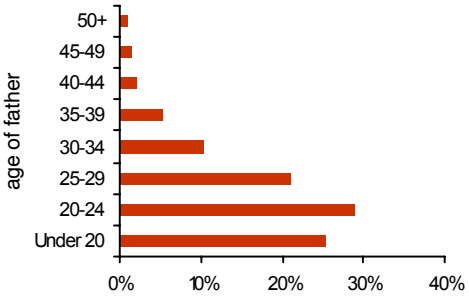


3. Mortality

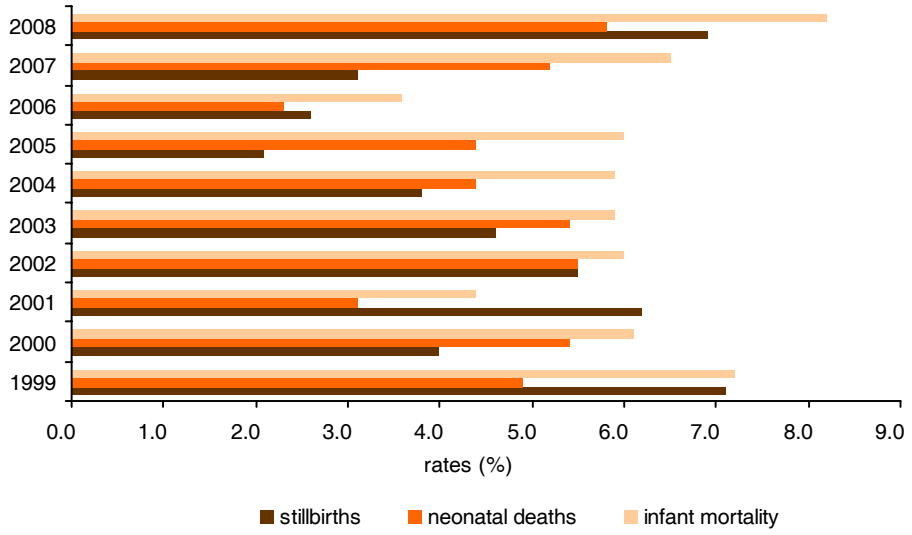
The total number of deaths registered during 2008 amounted to 3,243, an increase of 132 with respect to the previous year. Consequently, the crude death rate increased from 7.6, as calculated for 2007, to 7.9 for the year under review. 51 per cent of all deaths were males.

The highest death count was again registered within the Northern Harbour district. This district has the highest number of residents. In fact, the highest crude death rate was not registered in this district but in the Southern Harbour district and stood at 9.8. The lowest crude death fell, as in the previous year, in the Northern district and stood at 6.4.

The majority of the deaths occurred to persons aged 75 and over, as expected. In fact, 60 per cent of the persons who died during 2008 were either 75 or older. However, a significant proportion (31 per cent) were

between 55 and 74. There were also 48 persons below the age of 20 who died during the year under review; 34 of these were infants. The infant mortality rate has consequently risen from 6.5 in 2007 to 8.2 for the year under review. The numbers of stillbirths and neonatal deaths have also increased to 29 and 24 cases respectively. These three figures have been the highest recorded since 2000.

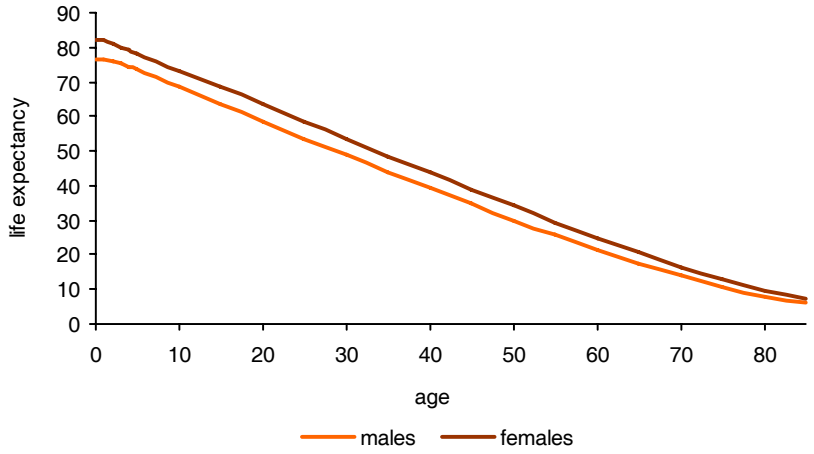
Chart 7. Stillbirths, neonatal deaths and infant mortality - annual rates: 1999-2008



Diseases related to the circulatory system featured as the most common cause of death, accounting for 39 per cent of the total. There was also a registered increase in deaths caused by neoplasms and diseases of the respiratory system, bringing these two counts to 855 and 298 respectively. Other significant values were obtained for mental and behavioural disorders (111 cases) and external causes of morbidity and mortality (136 cases).

The life expectancies for both sexes, calculated on the basis of the death rates recorded during 2008, were estimated at 77 years for males and 82 years for females. The life expectancy for males has remained the same as during the previous year, although that for females has increased by 1 year.

Chart 8. Life expectancy by single years of age: 2008



4. Marriages

The total number of marriages registered in Malta has remained practically unchanged compared to 2007, and amounted to 2,482. This figure includes the number of marriages occurring among foreigners (including tourists). The crude marriage rate for 2008 was estimated at 6.0.

Despite the total number of marriages remaining the same, there was a significant increase of 40 marriages in Gozo – up by 25 per cent with respect to the previous year. The selection of the months in which couples decided to tie the knot in Malta has remained the same as during the previous year. In fact, the majority of the marriages occurred during the second and third quarter – 34 per cent and 37 per cent respectively.

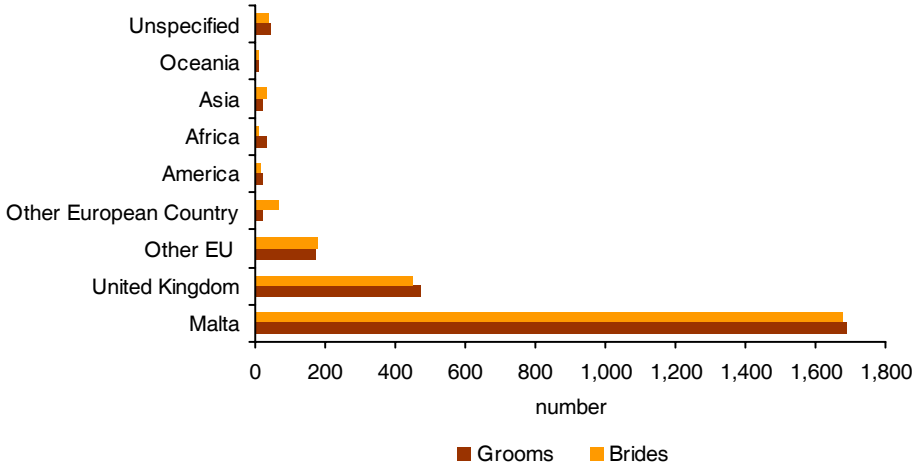
Most of the marriages occurred amongst spouses aged between 25 and 29 (43 per cent of brides and grooms). However, there were also significant numbers of grooms aged between 20 and 24 (9 per cent) and between 30 and 39 (34 per cent), and brides within these age groups (both at 24 per cent).

Chart 9. Marriages by single years of age of brides and grooms aged 16-55: 2008

The majority of spouses (91 per cent of grooms; 92 per cent of brides) got married for the first time during 2008. Another 7 per cent of grooms and 6 per cent of brides had obtained a divorce with regard to a previous marriage. There was also a number of widows, and persons whose previous marriage had been annulled and who married for another time in 2008.

The number of civil (non-religious) marriages amounted to 840, or nearly 34 per cent of the total in 2008. 300 civil marriages (35 per cent) involved Maltese spouses. Of these, in 107 civil marriages, both spouses were Maltese nationals. Most civil marriages occurred between British spouses (45 per cent). 78 per cent of the brides and 74 per cent of the grooms involved in these civil marriages were previously single.

Chart 10. Brides and grooms by country of citizenship: 2008



5. Migration

An estimated total of 9,033 persons immigrated during 2008, of whom 5,173 (57 per cent) were males. 13 per cent were returned migrants (immigrants with Maltese citizenship), half were citizens of another European Union country, while 37 per cent were third-country nationals. A total of 6,597 emigrated during 2008, bringing the net migration to 2,436. Nearly 60 per cent of the emigrants were males, and a quarter were less than 25 years old. 22 per cent of the emigrants had Maltese citizenship, while 57 per cent were citizens of another EU country. The remaining 21 per cent were third-country nationals.

Chart 11. Migration flows by country of citizenship: 2008

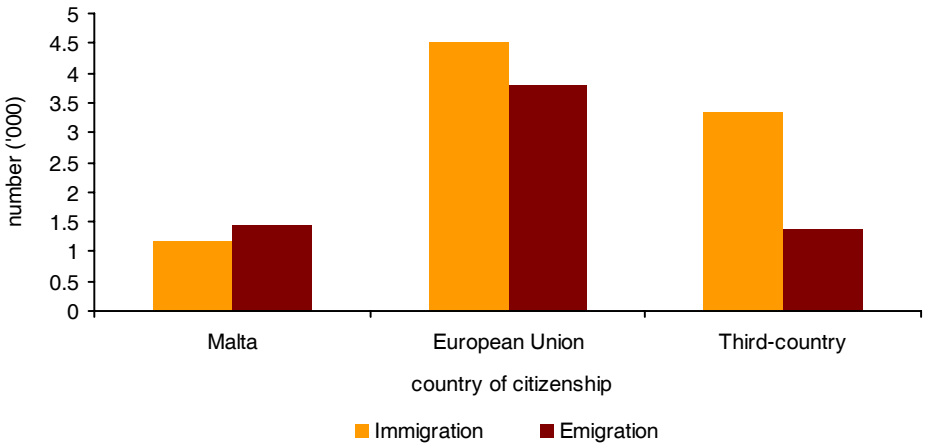


Chart 12. Net migration flows by age: 2008

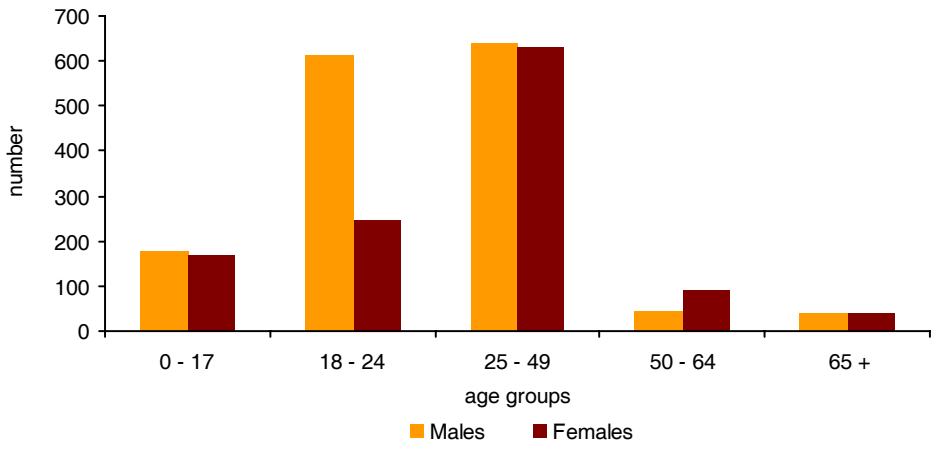
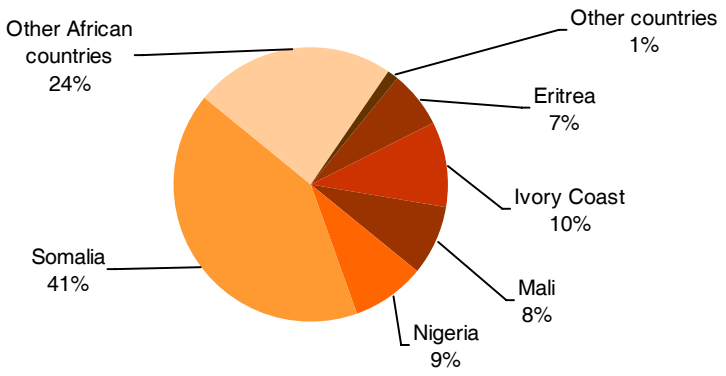


2008 saw an increase of 16 boats carrying irregular immigrants when compared to the previous year. The 84 boats arriving on Maltese shores carried a total of 2,775 individuals on board, an increase of 63 per cent when compared to the previous year.

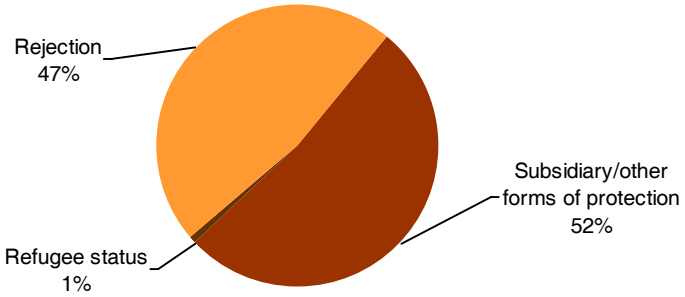
During the same year, the Office of the Commissioner for Refugees filed 2,608 new applications for asylum - an increase of 1,222 applications with respect to the previous year. 88 per cent of these applicants were males. The majority of applicants fell within the 18-34 age bracket (82 per cent). 41 per cent of applicants were Somali nationals.

Chart 13. Applications by citizenship: 2008



During 2008, the Office of the Commissioner for Refugees granted 1,416 positive decisions, and made 1,281 rejections for international protection. 19 applicants were granted refugee status whilst another 1,397 were granted other forms of international protection. 83 per cent of the applicants who were granted international protection were males. Of the applicants who were granted international protection, nearly 79 per cent were Somali, while another 19 per cent were Eritrean.

Chart 14. Decisions made by the Office of the Commissioner for Refugees: 2008



A total of 3,014 third-country nationals were found to be illegally present in Malta and were subject to an obligation to leave the country in 2008. Just over 1 per cent were Europeans, 97 per cent were Africans while 2 per cent were Asians. Nearly 87 per cent of these persons were males.

In December 2008, the total number of residents in Open Centres in Malta stood at 1,625 – 1,514 adults and 111 minors. A further 270 persons lived in other forms of housing. 87 per cent of the Open Centre population were males.

During 2008, a total of 644 individuals obtained Maltese citizenship through naturalisations and registrations. Of these, 51 per cent were females. 36 per cent came from Australia, whilst 34 per cent came from European countries.

6. Miscellaneous

6.1 Adoptions

During 2008 there were 71 registered adoptions; 38 per cent of the adopted children were Russians, nearly 20 per cent were Ethiopians and 25 per cent were Maltese. 45 per cent of the adopted children were less than one year old. 51 per cent of the children were girls. Just over a quarter of the adoptive parents lived in the Northern Harbour District.

6.2 Registered separations, annulments and divorces

There were 519 registered separations in 2008, a decrease of 19 per cent with respect to the previous year. Nearly 90 per cent of these separations involved couples where both spouses were Maltese citizens.

During the year under review, there were 188 registered annulments, of which 81 per cent were civil annulments. 12 per cent of the annulments involved civil marriages that had lasted for less than 5 years. Another 39 per cent of the annulments were granted after a marriage lasting between 5 and 9 years. 18 per cent of these marriages were religious. There was an increase of nearly 13 per cent in registered annulments with respect to 2007, caused by a rise in the number of civil marriage annulments.

In 2008 the Maltese Authorities recognised 31 divorces obtained abroad. Nearly 42 per cent of these divorces had been obtained in the United Kingdom. Most of the divorces were obtained by couples who had been married for over 20 years.

6.3 Crime

During 2008, the number of crime reports was 13,803, down by 8 per cent when compared to the previous year. Reported robberies registered the largest percentage drop (27 per cent). On the other hand, drug trafficking increased by nearly 21 per cent. During the year under review, the average yearly prison population numbered 444, marking an increase of 16 per cent over the figure recorded in 2007.

Definitions and Methodological Notes

- **Total Population** figures include both Maltese and non-Maltese residents. The total population at the end of year *t* is computed using the following equation:

$$P_t = P_{t-1} + B_t - D_t + I_t - E_t \text{, where}$$

  - P_t is the total population at the end of year *t*,
  - P_{t-1} is the total population at the end of year *t-1*,
  - B_t is the total number of births registered during year *t*,
  - D_t is the total number of deaths registered during year *t*,
  - I_t is the total immigration of both Maltese and foreign nationals registered during year *t*. This figure is measured by summing up the count of all new work permit and residence permit holders, together with their dependants, returned migrants and new adoptions of children from foreign countries.
  - E_t is the total emigration of both Maltese and foreign nationals registered during year *t*. This figure is measured by summing up the counts of all work permit and residence permit holders who fail to extend their permits during the year under review, together with their dependants, and other Maltese emigrants (i.e. persons who leave the country for a period of at least 12 months).

- **Maltese population** figures cover Maltese residents only. The Maltese population at the end of year *t* is computed using the following equation,

$$P'_t = P'_{t-1} + B'_t - D'_t + I'_t - E'_t \text{, where}$$

  - P'_t is the Maltese population at the end of year *t*,
  - P'_{t-1} is the Maltese population at the end of year *t-1*,
  - B'_t is the number of Maltese births registered during year *t*,
  - D'_t is the number of deaths occurring to Maltese citizens during year *t*,
  - I_t is the total immigration of Maltese nationals registered during year *t*. This figure is measured by summing up the count of returned migrants, all registrations and new adoptions of children from foreign countries.
  - E_t is the count of all Maltese residents who leave Malta to settle in another country for a period of at least 12 months.

Some of the **migration** components mentioned above have been estimated using auxiliary information, such as data obtained from the 2005 Population and Housing Census and other register data.

- Maltese and total **mid-year populations** are calculated by averaging beginning and end-year population estimates.

- **Emigration** is the action by which a natural person leaves his or her usual residence in the territory of the Member State for a period that is or is expected to last a minimum of 12 months.

- **Immigration** is the action by which a natural person establishes his or her usual residence in a territory of a Member State for a period that is or is expected to last a minimum of 12 months.

- **Registration** is the action by which foreign residents register themselves as Maltese citizens at the Expatriates and Citizenship Division. Registered persons are included in the Maltese population count.

- **Naturalisation** is the action by which a foreigner may be granted a Maltese citizenship according to the Maltese Citizenship Act.

- **Third-Country Nationals** refers to citizens of non-EU countries.

- **Total live births** include all births registered in Malta from both Maltese and non-Maltese parents. Still births are excluded. The **crude birth rate** is the number of total live births per thousand mid-year population.

- **Maltese live births** include all births registered in Malta having a Maltese father or a Maltese mother (in case the father has not been registered with the Public Authorities). The **Maltese crude birth rate** is the number of Maltese live births per thousand mid-year Maltese population.

- **Total fertility rate** is the estimated total number of live births occurring to an average woman during her fertile age (14 - 49).

- **Maternities** include both still and live births. Multiple births are counted as one maternity.

- **Maternity order** is the ranking of a newborn baby in relation to all the previous births (both still and live) of the mother; that is, the number of previous births (both still and live) plus the birth that has just occurred.

- **Still births** are deaths occurring to babies prior to the complete expulsion or extraction from its mother of a product of conception, after 22 weeks of gestation or weighing 500 grams and over.

- **Neonatal deaths** are deaths occurring within the first 28 days after birth.

- **Infant deaths** are deaths occurring during the first year of life. Infant mortality rate is the number of infant deaths per 1,000 life births.

- **Total deaths** include all registered Maltese and foreign deaths in Malta and Gozo. This count excludes tourists but includes Maltese citizens who die abroad and who are subsequently buried in Malta. Total deaths exclude still births. The **crude death rate** is the total number of deaths per thousand mid-year total population.

- **Maltese deaths** include all registered deaths of Maltese nationals in Malta and Gozo. This count includes also Maltese citizens who die abroad and who are subsequently buried in Malta. Still births are also excluded. The **Maltese crude death rate** is the number of Maltese deaths per thousand mid-year Maltese population.

- **Life expectancy at birth** is the number of years a newborn is expected to live if mortality in the various age groups remains at the level of the period in which the expectation of life is computed.

- **Total marriages** include all marriages registered in Malta and Gozo. This count includes marriages between non-resident foreign spouses. The **crude marriage rate** relates to the number of marriages per 1,000 total mid-year population.

- **Civil marriages** include all non-religious marriages that are recognised by law in Malta.

- Data on **separations** have been extracted from records held at the Public Registry of separations involving both Maltese and/or foreign spouses that have been concluded by a legal contract.

- Information on registered **annulments** of Religious and Civil Marriages between Maltese and/or foreign spouses is as according to records held at the Public Registry.

- **Divorces** obtained abroad involve both Maltese and foreign spouses. Information in this publication includes only those divorces that were accepted by the laws of Malta in terms of Section 33 of the Marriage Act, 1975 are registered at the Public Registry.

- **Asylum Statistics:**

  - A third-country national or stateless person is granted the **Geneva Convention status** (also referred to as Refugee status) if, owing to a well founded fear of being prosecuted for reasons of race, religion, nationality, political opinion or membership of a particular social group, is outside the country of nationality and is unable or, owing to such fear, is unwilling to avail himself of the protection of that country.

  - A person eligible for **subsidiary protection** is a third-country national or stateless person who does not qualify as a refugee but in respect of whom substantial grounds have been shown for believing that the person concerned, if returned to the country of former habitual residence, would face a real risk of suffering serious harm, or owing to such risk is unable to avail himself or herself of the protection of that country.

- **Crime:** Data on crime have been classified according to the classifications used by the Police Department, the data provider of crime statistics. The statistics available are based on filed crime reports as according to end 2008.

Classifications:

- Occupations are coded according to the International Standard Classification of Occupations (ISCO 88).
- Deaths by causes are classified according to the International Classification of Diseases (ICD).
- Localities are classified into districts according to the Malta Geographical Codes (MGC) as follows:

    - **Southern Harbour** - Żabbar, Xgħajra, Valletta, Tarxien, Santa Luċija, Paola, Marsa, Luqa, Kalkara, Senglea, Floriana, Fgura, Cospicua, Vittoriosa.

    - **Northern Harbour** - Ta' Xbiex, Swieqi, Sliema, Santa Venera, San Ġwann, St. Julians, Qormi, Pieta', Pembroke, Msida, Ħamrun, Gżira, Birkirkara.

    - **South Eastern** - Żurrieq, Żejtun, Safi, Qrendi, Mqabba, Marsaxlokk, Marsascala, Kirkop, Gudja, Għaxaq, Birżebbuġia.

    - **Western** - Żebbuġ, Siġġiewi, Rabat, Mtarfa, Mdina, Lija, Iklin, Dingli, Balzan, Attard.

    - **Northern** - St. Paul's Bay, Naxxar, Mosta, Mġarr, Mellieħa, Għargħur.

    - **Gozo and Comino** - Rabat, Fontana, Għajnsielem and Comino, Għarb, Għasri, Kerċem, Munxar, Nadur, Qala, San Lawrenz, Sannat, Xagħra, Xewkija, Żebbuġ.

Other notes:

- As from 2003, there has been a change in the method by which birth and death statistics are compiled. Prior to 2003, figures on births and deaths referred to Maltese persons only. In 2003 definitions were changed to include total births and deaths. Past data has been revised to reflect the new definitions and to ensure that the time series are consistent.

- There are slight differences with respect to data on total maternities by age of mother (Table 2.9 and Table 2.10). These discrepancies may be justified due to the fact that these tables were extracted from different registers which might have some minor inconsistencies.

- The methodology by which the population projections have been computed has been revised during last year. This mainly explains the inconsistencies of this year's projections when compared with others published before 2007.

The column l_x shows, for each sex, the number who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ^oe_x is the 'expectation of life', that is the average future lifetime which would be lived by persons aged exactly x, if likewise subject to those death rates.

3.14 Expectation of life, 1870/72 to 2005 and 2008

: Data not available.

- Intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Excluding attempted (uncompleted) homicide. Excluding causing death by dangerous driving, abortion and help with suicide. Unlike other offences, the counting unit for homicide is normally the victim.
- Violence against the person (such as physical assault), robbery (stealing by force or by threat of force), and sexual offences (including rape and sexual assault).
- Robbery is a sub-set of "violent crime". Stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Excluding pick-pocketing, extortion and blackmailing.
- Gaining access to a dwelling by the use of force to steal goods.
- Motor vehicles include all land vehicles with an engine that run on the road which are used to carry people (including cars, motor cycles, buses, lorries, construction and agricultural vehicles, etc.).
- Illegal possession, cultivation, production, supplying, transportation, importing, exporting, financing etc. of drug operations which are not solely in connection with personal use.

Annex

Annex: List of demographic indicators: 2008

Total end year Population		
	Males	205,873
	Females	207,736
Maltese end year Population		
	Males	196,280
	Females	199,192
Percentage annual population increase with previous year		0.8%
Projected total population		**('000)**
	2015	418.2
	2025	423.2
	2050	400.3
