

23 September 2013 | 1100 hrs | 181/2013

In the second quarter, employment declined by 7.5 per cent when compared to the corresponding quarter last year.

Short-term Construction Indicators: Q2/2013

Cut-off date:
13 September 2013

Employment

Employment in construction activities declined by 7.5 per cent to 78.1 points in the second quarter this year. Employment in the construction of buildings, civil engineering and in specialised construction activities declined by 5.1, 16.0 and 8.4 per cent respectively.

Hours worked

A year-on-year comparison for unadjusted hours worked indicates a decline of 6.4 per cent in the period under review. The largest decrease (-15.4 per cent) was registered in civil engineering. Furthermore, hours worked in the construction of buildings and in specialised construction activities declined, by 4.0 and 6.8 per cent respectively.

Gross Wages and Salaries

Wages and salaries decreased by 6.1 per cent on average. Furthermore, wages and salaries also contracted in the construction of buildings and specialised construction activities, by 4.4 and 5.6 per cent respectively.

New Dwelling permits

Residential permit data for the period under review revealed a marginal annual decline of 0.2 per cent. One-dwelling residential buildings types all registered increases, while permits for two and more dwelling residential units went down by 10.1 per cent ■

* The calculation of growth rates for the indices tables may slightly differ from the growth rates published due to rounding

Methodological Notes

1. This release contains data relating to employment, wages and salaries, and hours worked as well as new permits for residential buildings in the construction sector. The base year for the calculation of the indices is 2005. The calculation of growth rates from the indices table may slightly differ from the growth rates published due to rounding.
2. Figures for the last eight quarters, including the reference quarter period, are to be considered as provisional and subject to revision. However, in exceptional cases, back data may also be revised. The figures in this release are unadjusted.
3. The Short-term construction indicators release will only feature unadjusted data as in the majority of variables seasonality and calendar effects were not identified.
4. The NSO has adopted the methodologies and guidelines of Eurostat, the statistical office of the European Community.
5. The sampled enterprises transmit to the NSO data on employment, wages and salaries and hours worked. Employment includes all persons who work in the observed unit, inclusive of self-employed workers and unpaid family workers. Wages are calculated in euro, for every quarter. Hours worked is an indicator of the work carried out, inclusive of any overtime performed less any vacation or sick leave. The data on the number of residential units for which permits have been granted are obtained directly from the Malta Environment and Planning Authority (MEPA).
6. Construction activities covered in this release are in line with Section F of the statistical classification of economic activities in the European Community (NACE Rev. 2). In particular, these activities include the complete construction of buildings, the complete construction of civil engineering works, as well as specialised construction activities, if carried out only as a part of the construction process.
7. Units having real estate (Section L of NACE Rev. 2) as their primary activity are not included. Units primarily engaged in the following activities are also excluded: manufacture of other non-metallic mineral products, such as the manufacture of clay building material; the manufacture of cement, lime and plaster; the manufacture of articles of concrete, cement and plaster; and the cutting, shaping and finishing of stone. Quarrying of stone, sand and clay is also excluded.
8. A distribution of the aggregation weights falling under Section F of NACE Rev. 2 for each variable is presented in the following table:

NACE classification	Description	Employment	Wages and salaries	Hours worked
Section F	Construction	100.0	100.0	100.0
Division 41	Construction of buildings	39.4	43.4	47.0
Division 42	Civil engineering	5.2	8.5	8.3
Division 43	Specialised construction activities	55.4	48.1	44.7
