

24 April 2017 | 1100 hrs | 069/2017

In 2016, the general government registered a surplus of €101.0 million, equivalent to 1.0 per cent of GDP. The gross consolidated debt amounted to €5,766.5 million or 58.3 per cent of GDP.

General Government Balance and Debt under the Maastricht Treaty: First Reporting for 2017

General Government balance and debt position

Net lending (or surplus) of general government for 2016 amounted to around €101.0 million, shifting from a deficit of €119.3 million recorded in the previous year. This is calculated as the difference between total revenue (€3,871.3 million) and expenditure (€3,770.2 million) of general government.

		2013	2014	2015	2016
General Government deficit (-) / surplus (+)	€ millions	-199.2	-165.2	-119.3	101.0
	% of GDP	-2.6	-2.0	-1.3	1.0
General Government expenditure	€ millions	3,208.2	3,497.8	3,822.3	3,770.2
	% of GDP	42.0	41.5	41.2	38.1
General Government revenue	€ millions	3,009.0	3,332.6	3,703.0	3,871.3
	% of GDP	39.4	39.5	39.9	39.1
General Government debt	€ millions	5,246.3	5,421.1	5,622.1	5,766.5
	% of GDP	68.7	64.3	60.6	58.3

When measured as a percentage of GDP, the general government balance was equivalent to a surplus of 1.0 per cent, showing a significant improvement from a deficit of 1.3 per cent in 2015.

On the back of stock flow adjustments, the general government nominal gross consolidated debt increased by €144.4 million to €5,766.5 over 2015, however due to higher level in GDP, the debt-to-GDP ratio fell below the Maastricht debt criteria to 58.3 per cent (Table 1).

2016 data

In order to arrive at the General Government Sector's surplus for 2016, adjustments are made to the balance of the Government's consolidated fund, which registered a surplus of €8.9 million. The major positive adjustment is the net lending (or surplus) recorded by Extra Budgetary Units of €179.2 million, particularly by the setting up of the National Development and Social Fund, which receives 70 per cent of the contributions under the Individual Investor Programme, registering a surplus of €163.5 million. In addition, another positive adjustment includes the time-adjusted cash transactions (€4.8 million). On the other hand, the main negative adjustments to the consolidated fund included the 'other accounts receivable and payable' (€33.5 million), the treasury clearance fund (€24.4 million) and the equity injection to the national air carrier (€12.0 million) (Table 2).

Reporting and Updates

On 30 March, Malta submitted its report on government deficit and debt levels for the years 2013-2016. This was done in accordance with Council Regulation (EC) No. 479/2009, as amended by Commission Regulation (EU) No. 220/2014, as well as in accordance with the Code of Best Practice adopted by the Ecofin council on 18 February 2003.

When compared to the previous submission of 30 September 2016, the deficit of the General Government was revised for all the years under review with an upward revision of €0.1 million in 2013 and a downward revision of €0.7 million and €0.9 million in 2014 and 2015 respectively. The revisions for 2013 and 2014 were due to the availability of audited accounts for Extra Budgetary Units and for Local Councils. For 2015, the availability of audited accounts for Extra Budgetary Units resulted in a downward revision of €3.1 million, off-setting the deficit and thus, recording a surplus of around €1.0 million (for Extra Budgetary Units). Conversely, the 'other accounts receivable/payable' was revised upwards by €1.9 million.

With regards to General Government debt, data for 2015 was revised downwards by €0.2 million. The debt-to-GDP ratio for 2014 and 2015 were revised downwards due to higher levels in GDP.

Stock Flow Adjustment (SFA)

A stock flow adjustment of 2.5 per cent of GDP was recorded in 2016. This suggests that the debt increased despite the surplus of 1.0 per cent of GDP and thus, changes in government debt are attributable to other elements. The rise in debt was mainly due to the result of an increase in the 'holdings of currency and deposits'. Conversely, this increase was partially offset by lower 'other accounts receivable and payable' (Table 3).

Further information

The data presented in this release is different from the monthly news releases on government finance as the latter is limited to the Government's Consolidated Fund and are presented on a cash basis. The EDP exercise is compiled in line with the European System of Accounts (ESA) 2010 and the Manual on Government Deficit and Debt (2016 edition). It covers the General Government Sector; made up of the Budgetary Central Government, the Extra Budgetary Units (a list at the end of the release shows the EBUs forming part of the General Government sector as at the end of 2016) and the Local Government sector. Apart from the Consolidated Fund, other government's accounts such as Treasury Clearance and Sinking Funds are included, any financial transactions are excluded and various accruals adjustments are taken on board.

Data for the Government's Consolidated Fund is found at:

https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Government-Finance-Data.aspx

More information on the ESA 2010 revenue and expenditure categories, as well as the financial assets and liabilities and debt was published today in the News Release 'Quarterly Accounts for the General Government Sector: 2016Q4'. It can be accessed at:

https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Quarterly-Accounts-for-General-Government.aspx

The official EDP notification tables that were transmitted to the Commission can be found in the excel version of this news release at:

https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx

The EDP Consolidated Inventory of Sources and Methods in ESA 2010 is available on the NSO website. The document may be accessed at:

https://nso.gov.mt/en/nso/Sources_and_Methods/Unit_A2/Public_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx

Notes:

1. This list does not include entities which are already accounted for within the Departmental Accounting System (DAS) of Central Government.
2. General Classification of economic activities within the European communities. Industries are grouped into 64 categories (A64) based on NACE Rev 2.

Methodological Notes

1. Within the context of the EDP compilation, Government is taken to mean the General Government (S.13 sector according to the ESA 2010 definitions). This includes the Budgetary Central Government made up of Government ministries and departments, the Extra Budgetary Units (EBU's) which are classified as forming part of this sector, as well as all the Local Councils.
2. This release presents Government deficit and debt worked out in line with the procedure defined in the Maastricht Treaty (Article 104). The basic conceptual reference framework for this exercise is the ESA 2010 Manual on Government Deficit and Debt (2016 edition); which is in turn based on the European System of National and Regional Accounts (ESA 2010). This compliance with the reference framework allows for the international comparability of the data.
3. Article 104 of the Maastricht Treaty requires Member States to avoid excessive government deficits. In this respect the Commission monitors the development of the budgetary situation and of the stock of government debt. A protocol of the Maastricht Treaty specifies the reference percentages for general government deficit (which should not exceed 3 per cent of GDP), and for the gross *nominal* consolidated debt (which should not exceed 60 per cent of GDP).
4. The Stock Flow Adjustment (SFA) is the difference between the change in the stock of Government debt and the flow of annual Government deficit/surplus. Deficits normally contribute to an increase in debt levels, while surpluses reduce them. However, the change in government debt also reflects other elements.
5. The data contained in this release may be revised. Figures may not add up due to rounding.
