

In 2017, the General Government registered a surplus of €392.7 million, equivalent to 3.5 per cent of GDP. The gross consolidated debt amounted to €5,670.6 million or 50.9 per cent of GDP.

## General Government Balance and Debt under the Maastricht Treaty: Second Reporting for 2018

### General Government balance and debt position

The General Government registered a surplus of €392.7 million in 2017, an increase of €296.3 million over the previous year. The balance is calculated as the difference between the total revenue (€4,424.0 million) and expenditure (€4,031.3 million) of General Government. Comparing 2017 over 2016, total revenue increased by €554.3 million, while total expenditure increased by €257.9 million.

		2014	2015	2016	2017
General Government deficit (-) / surplus (+)	€ millions	-147.8	-97.6	96.4	392.7
	% of GDP	-1.7	-1.0	0.9	3.5
General Government expenditure	€ millions	3,494.4	3,817.4	3,773.3	4,031.3
	% of GDP	41.3	40.1	37.1	36.2
General Government revenue	€ millions	3,346.4	3,719.8	3,869.7	4,424.0
	% of GDP	39.5	39.1	38.0	39.7
General Government debt	€ millions	5,390.0	5,585.5	5,734.9	5,670.6
	% of GDP	63.7	58.6	56.3	50.9

When measured as a percentage of GDP, the General Government balance was equivalent to a surplus of 3.5 per cent, an increase of 2.6 percentage points when compared to the surplus of 0.9 per cent that was registered in 2016.

The General Government nominal gross consolidated debt decreased by €64.3 million to €5,670.6 million over 2016. Together with a higher level of GDP, the debt-to-GDP ratio for 2017 fell to 50.9 per cent (Table 1).

### 2017 data

In order to arrive at the General Government Sector's positive balance of €392.7 million, adjustments are made to the balance of the Government's Consolidated Fund (NSO news release 51/2018), which registered a surplus of €182.7 million – an increase over the €8.9 million recorded in 2016. The adjustments are necessary to shift from the Government's Consolidated Fund into an accruals-based exercise compiled in line with established methodology. The adjustments also take into consideration the Extra Budgetary Units (EBUs) which are classified within the General Government Sector, as well as the Local Government Sector. Table 2 provides the transition from the Consolidated Fund to the Net Lending/Net Borrowing of General Government.

One major positive adjustment is the net lending (or surplus) recorded by Extra Budgetary Units (EBU) of €196.7 million, an increase of €23.9 million over 2016. The EBU registering the highest surplus was the National Development and Social Fund (NDSF) with €171.7 million, constituting 70 per cent of the contributions under the Individual Investor Programme (IIP). Other positive adjustments to the Government's consolidated fund include the TCF flows in non-financial transactions (€37.2 million), as well as the time-adjusted cash transactions (€35.2 million). In contrast, the main negative adjustments include the 'other accounts receivable and payable' (€58.7 million) and other financial transactions (€11.5 million) (Table 2).

## Reporting and Updates

On 28 September, Malta submitted its report on government deficit and debt levels for the years 2014-2017. This was done in accordance with Council Regulations (EC) No. 479/2009, as amended by Commission Regulation (EU) No. 220/2014, as well as in accordance with the Code of Best Practice adopted by the ECOFIN council on 18 February 2003.

When compared to the previous submission of 29 March 2018, the balance of the General Government was revised for all the years under review with an improvement in the deficit of €0.8 million for 2014 and €6.7 million for 2015. Additionally, the General Government surplus for 2016 and 2017 were revised downwards by €4.6 million and €43.9 million respectively.

The revisions for 2014 and 2015 were due to the 'difference between the interest paid and interest accrued' as well as the 'other accounts receivable and payable'. For 2016 and 2017, the main revisions were the availability of audited accounts for Extra Budgetary Units which resulted in a downward revision of €3.5 million and €43.8 million respectively and the 'other accounts receivable and payable' which was revised upwards by €4.4 million in 2015 and downwards by €2.9 million in 2016 and €5.3 million in 2017.

With regards to General Government debt, data for 2016 and 2017 was revised upwards by €6.5 million and €28.0 million respectively on account of updated data for the Extra Budgetary Units.

## Stock Flow Adjustment (SFA)

A stock flow adjustment of 2.9 per cent of GDP was recorded in 2017. This suggests that the debt decreased less than implied by the recorded surplus of 3.5 per cent of GDP and thus, the change in government debt is attributable to other elements. The fall in General Government debt was mainly the result of an increase of 1.2 per cent of GDP in 'other accounts receivable and payable', together with an increase in the holdings of 'equity and investment fund shares' (0.8 per cent of GDP) and 'currency and deposits' (0.8 per cent of GDP) (Table 3).

## Further information

The data presented in this release is different from the monthly news releases on government finance as the latter is limited to the Government's Consolidated Fund and are presented on a cash basis. This exercise is compiled in line with the European System of Accounts (ESA) 2010 and the Manual on Government Deficit and Debt (2016 edition). It covers the General Government Sector; made up of the Budgetary Central Government, the Extra Budgetary and the Local Government sector. Apart from the Consolidated Fund, other government's accounts such as Treasury Clearance and Sinking Funds are included, any financial transactions are excluded and various accruals adjustments are taken on board.

Data for the Government's Consolidated Fund is found at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/Government-Finance-Data.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Government-Finance-Data.aspx)

More information on the revenue and expenditure categories, as well as the financial assets and liabilities and debt was published today in the News Release 'Quarterly Accounts for the General Government Sector: 2018Q2'. It can be accessed at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/Quarterly-Accounts-for-General-Government.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Quarterly-Accounts-for-General-Government.aspx)

The official EDP notification tables that are transmitted to the Commission can be found in the excel version of this news release at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx)

The EDP Consolidated Inventory of Sources and Methods in ESA 2010 is available on the NSO website. The document may be accessed at:

Notes:

1. This list does not include entities which are already accounted for within the Departmental Accounting System (DAS) of Central Government.
2. General Classification of economic activities within the European communities. Industries are grouped into 64 categories (A64) based on NACE Rev 2.

## Methodological Notes

1. Within the context of the EDP compilation, Government is taken to mean the General Government (S.13 sector according to the ESA 2010 definitions). This includes the Budgetary Central Government made up of Government ministries and departments, the Extra Budgetary Units (EBU's) which are classified as forming part of this sector, as well as all the Local Councils.
2. This release presents Government deficit and debt worked out in line with the procedure defined in the Maastricht Treaty (Article 104). The basic conceptual reference framework for this exercise is the ESA 2010 Manual on Government Deficit and Debt (2014 edition); which is in turn based on the European System of National and Regional Accounts (ESA 2010). This compliance with the reference framework allows for the international comparability of the data.
3. Article 104 of the Maastricht Treaty requires Member States to avoid excessive government deficits. In this respect the Commission monitors the development of the budgetary situation and of the stock of government debt. A protocol of the Maastricht Treaty specifies the reference percentages for general government deficit (which should not exceed 3 per cent of GDP), and for the gross *nominal* consolidated debt (which should not exceed 60 per cent of GDP).
4. The Stock Flow Adjustment (SFA) is the difference between the change in the stock of Government debt and the flow of annual Government deficit/surplus. Deficits normally contribute to an increase in debt levels, while surpluses reduce them. However, the change in government debt also reflects other elements.
5. The data contained in this release may be revised. Figures may not add up due to rounding.
