## List of Tables

Page

### CHAPTER 1 – AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS

1.1	Full-time and part-time farmers, livestock and poultry breeders by sex and age group	3
1.2	Type of agricultural land by district	4
1.3	Type of agricultural land by locality	5
1.4	Distribution of agricultural holdings by region	6
1.5	Distribution of agricultural holdings by region	6

### CHAPTER 2 – VINEYARDS

2.1	Total area and number of vines by region	9
2.2	Area and number of vines by locality	10
2.3	Percentage coverage of area and percentage of vines by region	12
2.4	Area under vineyards by variety and region	12
2.5	Distribution of holdings by area under vineyards and number of vines by district	13

### CHAPTER 3 - THE PIG INDUSTRY

3.1	Number of farms by pig population	17
3.2	Swine population by type	18
3.3	Distribution of pigs by size class of pigs	19
3.4	Distribution of sows by size class of sows	20
3.5	Distribution of pigs and pig farms by size class of pigs and region	21
3.6	Pig population by region	22
3.7	Slaughtering of livestock-swine (heads)	23
3.8	Slaughtering of livestock-swine (carcass weight in kgs)	24

### CHAPTER 4 - THE CATTLE INDUSTRY

4.1	Number of farms by cattle population	27
4.2	Cattle population by type	28
4.3	Distribution of cattle and cattle farms by herd size and region	29
4.4	Cattle distribution by herd size of cattle	30
4.5	Dairy cow distribution by size class of dairy cows	31
4.6	Cattle population by region	32
4.7	Slaughtering of livestock - cattle (heads)	33
4.8	Slaughtering of livestock - cattle (carcass weight in kgs)	34

### CHAPTER 5 – SHEEP AND GOATS

5.1	Distribution of sheep and goats population by district	37
5.2	Sheep population by type by district	38
5.3	Goat population by type by district	39
5.4	Sheep population by district and herd size	40
5.5	Goat population by district and herd size	41

### CHAPTER 6 – POULTRY

6.1	Distribution of poultry farms by farm size (m <sup>2</sup> )	45
6.2	Distribution of poultry farms by current capacity	46
6.3	Number of poultry farms by farm size (m <sup>2</sup> ) and current capacity	47
6.4	Distribution of poultry population by type by district	48

**CHAPTER 7 – OUTPUT OF THE AGRICULTURAL INDUSTRY**

7.1	Wholesale quantity of vegetables sold through official markets	51
7.2	Wholesale value of vegetables sold through official markets	52
7.3	Monthly wholesale quantities of vegetables sold through official markets 2002	53
7.4	Monthly wholesale value of vegetables sold through official markets 2002	54
7.5	Wholesale quantity of fruit sold through official markets	55
7.6	Wholesale value of fruit sold through official markets	56
7.7	Monthly wholesale quantities of fruit sold through official markets 2002	57
7.8	Monthly wholesale value of fruit sold through official markets 2002	58
7.9	Average wholesale prices of marketed fruit and vegetables	59
7.10	Total estimated output of fruit and vegetables	61
7.11	Total estimated value of fruit and vegetables	63
7.12	Slaughtering quantities (carcass weight)	65
7.13	Monthly slaughtering quantities 2002 (carcass weight)	66
7.14	Slaughter values of animals slaughtered at licensed slaughter houses	67
7.15	Monthly slaughtering values 2002	68
7.16	Estimated quantity of milk production	69
7.17	Monthly egg production	70
7.18	Monthly milk intake	71

**CHAPTER 8 - AGRICULTURE INDICES**

8.1	Vegetables: Price Index	75
8.2	Fruit: Price Index	81
8.3	Vegetables: Volume Index	85
8.4	Fruit: Volume Index	91
8.5	Annual slaughtering production volume index (1995 = 100)	95
8.6	Monthly slaughtering volume indices: January - December 2002 (1995 = 100)	96
8.7	Dairy milk intake volume index (1995 = 100)	97
8.8	Egg production volume index (1995 = 100)	98
8.9	Monthly and annual producer price indices for agricultural products - 2002 (2000 = 100)	99
8.10	Monthly and annual input price indices for agricultural products - 2002 (2000 = 100)	101

**CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

9.1	Value added account for agriculture 2002	105
9.2	Components of the net value added	106
9.3	Components of gross agricultural production: 2000	107
9.4	Components of gross agricultural production: 2001	108
9.5	Components of gross agricultural production: 2002	109
9.6	Components of intermediate consumption	110
9.7	Components of gross production	111

**CHAPTER 10 - SUPPLY BALANCE SHEETS**

10.1	Cereals	115
10.2	Rice	118
10.3	Dried pulses	121
10.4	Potatoes and potato starch	122
10.5	Oleaginous seeds and fruits	124
10.6	Vegetable fats and oils	127
10.7	Prepared fats and oils	130
10.8	Oil cakes	132
10.9	Sugar	134
10.10	Fruit and vegetables	135
10.11	Vegetables and fruit by species	137
10.12	Wine	140
10.13	Meat	143
10.14	Milk and milk products	145
10.15	Eggs: 2002	147

**CHAPTER 11 – FISHERIES**

11.1	Vessel distribution by region	151
11.2	Vessel distribution by type in the Maltese Islands	151
11.3	Fishing fleet by type by region	152
11.4	Vessel distribution by type by length (m)	153
11.5	Full-time fishermen distribution by vessel type by length (m)	153
11.6	Value of fish landings at official market	154
11.7	Quantity of fish landings at official market	155

## List of Charts

	Page
<b>CHAPTER 1 – AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS</b>	
1.1 Percentage distribution of Utilised Agricultural Area (UAA) by district	4
1.2 Distribution of agricultural holdings by size class of agricultural holdings by region	6
<b>CHAPTER 2 – VINEYARDS</b>	
2.1 Percentage distribution of vineyards: Maltese Islands	9
2.2 Distribution of vineyards (ha) by size class of vineyard (ha) by region	13
2.3 Percentage distribution of vineyards (ha) by district	13
<b>CHAPTER 3 – THE PIG INDUSTRY</b>	
3.1 Distribution of pigs and pig farms by district	17
3.2 Percentage changes in pig structures: 2001/2000 and 2002/2001	22
3.3 Percentage distribution of the pig population by region: 2002	22
<b>CHAPTER 4 – THE CATTLE INDUSTRY</b>	
4.1 Distribution of cattle and cattle farms by district	27

## **Foreword**

Although the Agriculture and Fisheries sector is a relatively small contributor to the Gross Domestic Product, Malta is self sufficient in this sector.

This is the third consecutive year that the National Statistics Office is providing statistical information about the structure of the agriculture and fisheries. While it is an indispensable tool for policy makers, this set of data is a handy reference tool that provides useful information to the users, both local and foreign. This publication gives a clear indication of the behavior of the sector and helps to monitor the trends in the different domains.

The 2002 publication covers the full spectrum of the statistical and economic information of the different domains in agriculture:- from land cover to livestock; output of the sector to indices; economic accounts to balance sheets and the fisheries sector.

The energy, hard work and effort have been put together to make this publication possible.

Alfred Camilleri  
Director General

**This is a blank page**

## **COMMENTARY**

### **INTRODUCTION**

Reliable statistics are the gauge to monitor the behavior of an activity over a period of years. This is the third consecutive year that the National Statistics Office is publishing a set of Agricultural tables. The first set was presented as a hard copy and the latter two in electronic format.

### **CHAPTER 1 - AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS**

The data in this chapter is based on the Agricultural Census which was carried out in October 2001. Table 1.1 refers to all agricultural workers who were engaged in any agricultural activity during the full year prior to the Census date. On the other hand, the agricultural land area refers to 1<sup>st</sup> October, 2001 – census date.

Table 1.2 refers to agricultural land area used by the holding for agricultural production. The term 'Dry Land' refers to agricultural land area which depends on the rainy season. Only one crop in a calendar year is grown on 'dry' land. 'Irrigated land' is the agricultural land area on which the crop can be irrigated all the year round and the land has continuous supply of water, all the year round, irrespective of whether it has a natural spring, served by second class water or water supplied by any other source. It is normal practice that on 'irrigated land', more than one crop cycle is grown during the period of one year. 'Garage land' is land belonging to the holding but has no agricultural value because of the scarcity of the soil or is rocky in nature.

### **CHAPTER 2 - VINEYARDS**

Basically, the data in this chapter is an update of the Census of Agriculture and data which was collected by the Viticulture Section of the Ministry of Agriculture. New plantations during the year 2002 were added to the census data. Since no thresholds were applied in the compilation of the census data, this includes both commercial vineyards and vineyards for table grapes, irrespective of land area. The data supplied by the Ministry of Agriculture includes the number of holdings, land area under new plantations, number of vines and variety of the vines.

Table 2.1 and Table 2.2 refer to the total area under vines and the number of vines on NUTS level 4 and 5 classification, respectively. Table 2.5 refers to the total number of holdings growing vines and classified by size class grouped by NUTS 4 level.

### **CHAPTER 3 - PIG INDUSTRY**

A census to determine the number of heads in the pig industry was carried out at the end of the year 2002. The census date was, 1<sup>st</sup> December, 2002. A postal questionnaire was sent to all holdings which are licensed to operate in the sector. No thresholds were used. Non-respondents were contacted by telephone and at the end, a response rate was 94 per cent was registered, with the remaining 6 per cent were imputed from previous surveys. All data collected was counter checked with previous surveys collected by the NSO. Data for slaughtering statistics is compiled from the official data which is supplied on a monthly basis, by the Veterinary Services.

## **CHAPTER 4 - CATTLE INDUSTRY**

A census, with a reference date of 1<sup>st</sup> December, 2002, was held among herdsmen at the end of the year 2002. The livestock industry is controlled by the Veterinary Services. While it is imperative to have an operating license, a livestock register is maintained by the same body.

As with the pig census, the same methods were used in the compilation of the cattle population. A postal questionnaire was mailed to all holdings, irrespective of the number of heads on the farm, and non respondents were followed up by telephone. The results shown in the tables of this chapter are made up of 93 per cent response rate and a 7 per cent imputation from previous surveys.

Slaughtering data are compiled on a monthly basis from returns submitted to the NSO from the Veterinary Services Department, from the official records kept at the slaughterhouses.

## **CHAPTER 5 - SHEEP AND GOATS**

Estimates on the populations of Sheep and Goats have been provided for the first time. The Ministry of Rural Development, Agriculture, and the Environment (MRAE) have provided these estimates to Agriculture and Fisheries Unit. The estimates of Sheep and Goats have been derived from the list of sheep and goat breeders that are kept at the Department of Veterinary Services.

Rearing of sheep and goats is mainly intended for the production of the traditional Maltese cheeslet (gbejna). As a backyard industry sheep and goats are not normally slaughtered at the civil abattoir although annual estimates within the Economic Accounts for Agriculture are provided. Only a minimal amount of sheep and goats are slaughtered at the civil abattoir.

## **CHAPTER 6 - POULTRY**

A comprehensive Poultry Census was carried out at the end of 2002, with a census date as at 1st September, 2002. All farms which were licensed to operate were covered by the census. The list of holdings licensed to operate within this sector was provided by the Poultry Division within the Department of Veterinary Services.

Poultry farms specializing in the production of broilers operate on a cycle system. An average of five cycles are conducted annually, with a resting period of four weeks between one cycle and the other. Some farms were found to be in their resting period during the census.

## **CHAPTER 7 - OUTPUT OF THE AGRICULTURAL INDUSTRY**

Tables 5.1 to 5.8 refer to the total wholesale quantities and values of the agricultural produce that passes through the official markets. The average wholesale prices of marketed fruit and vegetables which are shown in table 5.9, are the total annual unit price per kilogram.

The estimated volume and value of agricultural produce shown in tables 5.10 and 5.11 refer to the official marketing data, together with a provision for direct sales to the consumer, direct sales to industry, potato export and farm consumption. Purchases of tomatoes and grapes are compiled by the NSO from returns submitted by the industry itself. The volume and value of potato export, which is monitored by the Ministry of Agriculture, is submitted to the NSO on a yearly basis.

Whilst livestock slaughtering data is provided to the NSO by the Veterinary Services, data for poultry is compiled through monthly returns provided by the slaughter houses, directly to the NSO.

## **CHAPTER 8 - AGRICULTURE INDICES**

Agriculture price indices are used in relation with the analysis of price developments over a number of years. The field of observation of a price index covers all goods and services for which it is desired to measure price trends. The selling prices of agricultural products and purchase prices of the means of agricultural production provide information on trends on prices.

The agricultural price indices on specific sectors have been compiled since 1995. The prices are obtained from official markets of fruit and vegetables, the department of Veterinary Services and the dairy plant.

The 'producer price index' for agricultural products (Table 6.9) is a similar index that uses the same sources for information but provides a level of indices on a broader level. This type of index was introduced in the year 2000. The producer price is the price received by the farmer without deducting taxes and without the inclusion of subsidies. The 'Input Price Index' (Table 6.10) measures trends in purchase prices of certain goods and products used to produce agricultural products. Both these indices have been compiled with a base year 2000.

The 'Producer Price Index' for agriculture relates to sales of agricultural produce outside the agricultural industry, while sales of agricultural produce to other agricultural units are not taken into consideration. This concept is known as the 'National Farm Concept'

## **CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

The Economic Accounts for Agriculture are a unique source of information that provides the analysis of the production process and the incomes generated by it. The Net Value Added is the gauge which policy makers monitor trends in the agricultural sector and also make comparisons of income generated by the agricultural industry with other sectors of the economy.

The Economic Accounts are based on the European System of Integrated Economic Accounts (ESA) was compiled in 1999 and this publication has Economic Accounts for Agriculture for the years 2000, 2001 and 2002.

The production account can be split into two parts. Total output of agriculture, which was compiled using statistical data from:-

- Official markets
- Department of Veterinary Services
- Dairy industry
- Extensive surveys carried out by the NSO
- Other Administrative sources and expert estimates

The input side was compiled using:-

- Trade Data
- Business Statistics
- Extensive surveys carried out by the NSO
- Other administrative sources and expert estimates

The Net Value Added is the difference between total Output and Intermediate Consumption after providing for Consumption of Fixed Capital. The net value added is the summation of all the returns to all the factors of production within the agricultural sector.

## **CHAPTER 10 - SUPPLY BALANCE SHEETS**

A supply balance sheet presents a comprehensive picture of the pattern of a country's supply during a specified reference period. The total quantity of a commodity produced in a country, added to the total quantity imported and adjusted to any change in stocks that may have occurred since the beginning of the reference period, gives the supply available during that period.

A set of Supply Balance Sheets of agricultural commodities are being published from the period 1999/2000. The trade data for the compilation of the supply balance sheets is compiled by the International Trade Data Section of the NSO, through customs documents. Production data for the different commodities is compiled using administrative data, data compiled by the Agriculture and Fisheries unit and expert estimates.

## **CHAPTER 11 - FISHERIES**

The source of the data appearing in this chapter is derived from administrative registers kept at the National Aquaculture Centre at the Ministry of Rural Development and Environment. The update of the data is an ongoing process and the database, the MaltaStat Fishing Vessel Register, was established in collaboration with FAO.

According to the fisheries regulations, fish caught by local fishermen has to be sold through the wholesale Fish market. Catches are sold by public auction through a middleman and all dealers are registered with the Fisheries Department.

Statistical data for fish landings is collected through the official daily returns of fish landings and compiled on a monthly basis.
