## COMMENTARY

### Air Transport

In 2005, passenger traffic at the Malta International Airport decreased by 1,489 passengers when compared to 2004 (see Table 1). A strong increase was recorded in the first quarter but decreases were recorded throughout the rest of the year, as shown below:

January - March	-	6.6 per cent
April - June	-	- 0.6 per cent
July - September	-	- 1.0 per cent
October - December	-	- 2.6 per cent

The main increases occurred from the UK, Germany and 'Other EU' countries. There were also substantial decreases from Italy, 'Other European' countries as well as 'Africa and Asia'. The key destination in 2005 was UK with 1,079,523 passengers or 39.2 per cent of the total passenger movements (see Table 2).

UK airports remained the most requested by the passengers travelling to and from Malta. Altogether, as specified in Table 3.1, these airports accounted for 1,084,463 passengers, implying an increase of 1.0 per cent over the preceding year. The largest number of passengers passed through London Gatwick – 356,523 passengers – followed by Manchester and London Heathrow with 242,539 and 156,390 passengers respectively.

During the year under review, Air Malta continued to be the major carrier, taking up 55.1 per cent of the total aircraft movements and 56.5 per cent of the total passenger movements. In 2005, the national airline carried 1,556,568 passengers, a decrease of 3.2 per cent over the previous year. British Airways followed by 150,157 passengers carried or an increase of 35.0 per cent when compared to 2004 (see Table 4).

### Maritime Transport

As at end 2005, the largest number of yachts arriving at Malta - 19 vessels - was recorded in respect of vessels registered in the Cayman Islands. The highest number of passenger-vessels had a Bahamas registration, amounting to 78 (see Table 7).

In 2005, 1,677,186 tons of units were unloaded, resulting in an increase of 800 tons when compared to 2004. The total number of loaded units during 2005 was 341,006 tons, a decrease of 10,883 tons or 3.1 per cent when compared to the previous year (see Table 22).

### Gozo Channel

In 2005, commuters between Malta and Gozo decreased by 1.4 per cent, totalling 3,462,601. Furthermore, 889,805 vehicles were carried by scheduled vessels, down by 2.7 per cent when compared to the previous year (see Table 23).

During the year under review, the number of trips performed between the two islands amounted to 18,789 a decrease of 0.2 per cent when compared to 2004.

Table 24 shows that during 2005, the Ta' Pinu vessel reduced its trips by 723 when compared to the previous year. Conversely, the Gaudos and the Malita increased their trips by 142 and 803 respectively.

Charts 4 and 5 respectively show the average number of passengers and vehicles per trip and per vessel. Malita's average is consistently higher compared to the other two vessels on account of its greater vehicle-carrying capacity.

## **Road Traffic Accidents**

In 2005, the number of reported traffic accidents reached 15,584, a decrease of 59 cases or 0.4 per cent when compared to the previous year. The highest increase in such accidents was registered in the South Eastern district, up by 130 cases or 10.5 per cent. On the other hand, the Southern Harbour and Northern Harbour districts both registered similar decreases of 114 and 112 cases respectively. However, the Northern Harbour district tallied the largest number of accidents in 2005 totalling 6,055 cases or 38.9 per cent of the total (see Table 25).

2005 saw 1,156 traffic casualties reported. Of these, 588 drivers sustained injuries: 456 suffered slight injuries and 132 suffered grievous ones. During the same year, 296 passengers and 131 pedestrians suffered slight injuries, while 64 passengers and 61 pedestrians suffered grievous ones. In 2005, there were 16 fatalities – four drivers, six passengers and six pedestrians (see Tables 27-29).

On a gender basis, slightly-injured persons in 2005 numbered 883 – 534 males and 349 females. Grievously-injured persons came up to 257, the majority being males. The 16 fatalities in this year comprised 12 males and four females. The largest numbers of male and female casualties were in the 25-39 age group (see Table 30).

B'Kara was the locality with the highest rate of traffic accidents, with 866 cases. St. Paul's Bay and Marsa followed closely, with 844 and 839 reported accidents respectively (see Table 34).

More than half of traffic casualties occurred during weekends between Friday and Sunday (see Chart 8). Moreover, in 2005, 76.3 per cent of casualties were caused by passenger cars while 11.4 per cent were caused by motorcycles (see Tables 32-33).

## **Licensed Motor Vehicles**

As at end of 2005, the total number of licensed vehicles in Malta amounted to 271,338. Private vehicles added up to 206,148 or 76.0 per cent of the total (see Table 35). Newly-licensed motor vehicles amounted to 12,953; of which 7,568 were newly-licensed 'new' vehicles and the rest 5,385 were newly-licensed 'used' ones (see Tables 36-38).

## **Transport Equipment**

As at end of the year being reviewed, motorcycles amounted to 19,808 – of these 18,935 were recorded of having a petrol engine, five a diesel engine and 858 had alternative power sources. Furthermore, 12,625 or 63.7 per cent of these were more than 10 years old.

Passenger cars amounted to 248,855 – of these 177,791 had a petrol engine, 69,949 a diesel engine and 296 had alternative power sources. Moreover, 131,532 passenger cars or 52.9 per cent of the total were more than 10 years old. Passenger cars having a Gross Vehicle Weight between 1,250kg and 1,499kg constituted the largest share amounting to 92,419 or 37.1 per cent of the total.

Motor coaches, buses and trolley buses totalled 1,176 vehicles, the vast majority having a diesel engine. Again, the majority of these vehicles were more than 10 years old.

As at end 2006, the number of lorries amounted to 40,764 with 91.0 per cent having a carrying capacity of more than 1,500kg. Of these vehicles, 1,770 had a petrol engine, 38,918 had a diesel engine and 14 were powered by an alternative source. The majority of lorries had a Gross Vehicle Weight between 2,000kg and 4,999kg, coming up to 61.2 per cent of the total. Again in the case of lorries, most of them were recorded as being over 10 years old.

As at end 2005, road tractors amounted to 3,164 – 23 with a petrol engine, 3,110 with a diesel engine, eight with alternative power sources. Regarding age, road tractors followed the pattern of lorries and other vehicle types reported on in this publication, with nearly 74 per cent past the 10 year mark (see Tables 41-42).

### **Vehicle Road-Worthiness Test**

In 2005, 118,112 tests were carried out on Class 2 and Class 3 vehicles – of these 86.6 per cent passed the initial test. Of the failed ones 14,135 were re-tested with the vast majority passing the re-test (see Table 43).
