*Questions.*

XVIII. On what conditions are remissions of imprisonment granted?

XIX. Have Coroners's Inquests been held on every occasion of a death in prison during the past year and what were the verdicts?

XX.

(1.) What was the sanitary state of the Prison during the year 1892?

(2.) What were the prevailing diseases?

XXI. What are, shortly, the rules as to Diet?

*Answers.*

Every prisoner sentenced to imprisonment for twenty-five months and over, is entitled, if of good behaviour, to a remission of part of the remainder of his sentence, at the rate of one day for each week during the third year, and three days for each week during the subsequent years.

Two deaths occurred in 1892; one from heart disease and one from congestion of the brain. An Inquest was held in the latter case.

Excellent.

Syphilis, Heart-disease, and Gastric disorders.

*Simple Imprisonment.*

First three Weeks—

Sundays, Tuesdays and Thursdays, 24 oz. bread and  $\frac{1}{2}$  pint soup.

Mondays, Wednesdays, Fridays, and Saturdays 27 oz. bread and 1 ration cheese, salt-fish or olives.

Remaining time—

28 oz. bread, 1 pint soup on Sundays, Tuesdays and Thursdays.

31 oz. bread, and 1 ration cheese, olives or salt-fish on the other four days.

Valletta Prison. (*In the Palace of the Courts of Justice.*)*Questions.**Answers.*

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

It is not in a separate system, and no effectual separation can, as a rule, be enforced either by night or by day in consequence of the premises being so defective and ill suited for the object for which they are intended, viz :

- 1st. The detention of persons sentenced to imprisonment for periods not exceeding three days ;
- 2nd. The temporary detention of persons apprehended, until taken before the Magistrates ;
- 3rd. The detention of offenders undergoing examination by the Magistrates ;
- 4th. The detention of offenders committed for trial before H. M.'s Criminal Court.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

They are occasionally supervised by the Keeper of the Prison and by his Assistant.

III. How many cells are there ; and how many associated wards ?

There are 16 cells, only 12 of which can be used, the remaining four being very damp, dark and unsanitary.

IV. Taking the *average* number of prisoners in goal, how many cubic feet of space are there for each prisoner during the hours of sleep ?

Considering that in the front wall of each cell there is a large opening looking into the adjoining yard, and the consequent continued admittance of pure air, besides the ventilators leading to the roof of the prison, no possible doubt can be entertained of the prisoners breathing foul air, or being in any way too closely confined.

V. How are the prisoners classified ?

Endeavours are made to classify them as per Answer to Question I, but very often this is found to be impracticable. On many occasions the separation of boys from grown up criminals and even of the latter from female prisoners is as much as can be effected.

VI. Is penal labour—that is labour by tread-mill, crank, or shot drill—in force ?

No hard labour in force.
