WEIGHTS, AND MEASURES.

1895.

COURSE OF EXCHANGE

FOR THE YEAR 1895.

Exchanges—Rates of exchange on London in the course of the year did not fluctuate to an appreciable extent as the exportation of local produce was also very limited—The exchanges on Italy ranged between 27 and 28 25, the average rate for the year being 27 30.

" Cairo	1 % "	1/4 % "	3/4 % "

Specie—Sovereigns under the current weight, viz. 122 1/2 grains, and half sovereigns under 61 1/2 grains, are usually purchased by weight only, the holder bearing the cost of abrasion. By Government notice of the 1st September 1893 it was notified that the Anglo-Maltese Bank and the Banco di Malta, had undertaken to receive, on behalf of the Government, the British light gold in the terms of the Order of Her Majesty the Queen in Council of the 16th March 1892, to be exchanged at the Bank of England.—The light coins have since diminished very much from circulation.

Pre-Victorian Gold—In virtue of Government Notice of the 27th February 1890 pre-Victorian Gold was withdrawn from circulation. £ 2,960 1/2 in sovereigns and half sovereigns were deposited with the Receiver General for conversion, which was effected at a loss of 2 1/4 pence per £, as per Government Notice of the 10th April. The total amount of pre-Victorian gold then existing in Malta may be reckoned approximately at £ 8,000. What was not deposited with the Receiver General was taken up by private speculators, and in some cases at very onerous conditions for the holders.

COINS.

Pursuant to an Order of Her Majesty in Council of the 24th of September 1886, British Coins are the only legal tender in these Islands and the limit up to which Silver and Bronze Coins are received is raised to five pounds and one shilling respectively.

Twenty franc pieces and five franc pieces both French and Italian are, now, merely kept in deposit as articles of merchandize for exportation to the neighbouring centres of Trade such as Tunis, Tripoli, Syria, and Sicily, when a demand arises for them for the purchase of produce, or for the payment of bills payable in Francs or Lire. The demand for Napoleons for Tripoli and Bengasi, which was so brisk during the preceding five years that in some instances they were purchased at $\frac{1}{2}d.$ each premium, was very limited in 1895 on account of the reduced export of Esparto.

Further measures have been undertaken by this Government for reducing the surplus of Silver coin defaced in circulation.

The currency consists of British gold and silver:—gold coin below legal tender weight is rejected. The system of making payments by cheques has been of late much appreciated; and has been adopted by nearly the whole Commercial community.

In November 1889 the Malta Government made arrangements for the deposit of public moneys in the Anglo-Maltese Bank and the Banco di Malta, the Banks paying interest at the rate of $2\frac{1}{2}\%$ per annum on the minimum balance for each month, and in 1894 the Anglo-Maltese Bank undertook the whole banking business of the Government on the understanding that the Bank would pay interest at the rate of $2\frac{1}{2}\%$ per annum on the minimum balance of each month, after deducting £ 2,000, and that no interest would be payable on any amount beyond £ 10,000.

In June 1892 His Excellency the Governor, to accord facilities to the Commercial Community, authorized Heads of Department to receive payments by certified cheques on The Anglo-Maltese Bank and on the Banco di Malta, and since 1894 the Anglo-Maltese Bank has alone carried on all the Banking Business of the Government.

A political agitation, based on a misinterpretation of the effects of Ordinance VI of 1895, was made use of to bring about a sudden withdrawal of Deposits from the Savings Bank. Over £ 50,000 were paid out to depositors, between the last days of August and November, from the resources of the Government without any inconvenience.

CIRCULATION.

The British gold coin held in Malta fluctuates according to the sums imported and exported and the requirements of the Fleet. It is at present roughly estimated at

Sovereigns	£ 300,000
Half Sovereigns	5,000
									Total	£ 305,000
and the British silver coin at		80,000
									Specie	385,000

The note circulation is at present restricted to the notes of two Local Banks (about £ 30,000)

The Banks issue notes without being subject to any statutory restrictions. Legislation on this point appears advisable.

ACCOUNTS KEPT.

By Government, in Sterling.

„ Commerce likewise in sterling: a few merchants, however, of the Marina and Casals (villages) still continue to keep their Accounts according to the old style in Scudi, Tari and Grains:—

One Maltese Scudo is generally reckoned at $1/8$.

A Tari „ „ $-/1\frac{2}{3}$.

A Grain „ „ $-/0\frac{1}{2}$.

Twelve Maltese Scudi are „ „ 20/- or £ 1 Sterling.

The Maltese Coins have been demonetized; Coins to the nominal value of about £ 12,000 were withdrawn from circulation in November 1886.

Rate of exchange of British and Maltese Coins, in terms of Proclamation No. I of 10th March 1851.

			Scudi	Tari	Grains
