Foreword

The Demographic Review is a publication which comprises the main demographic events together with migration statistics. Detailed information on population counts, births, deaths, migration, family formation and dissolution are presented in this publication.

This is the first annual demographic review to be published after the revisions exercise which was carried out last year, further to the 2011 Population and Housing Census.

When analysing the data presented in the tables as well as emerging trends, users are encouraged to consult the methodological notes. The National Statistics Office would like to thank the data providers who supply crucial information required for the compilation of these statistics.

My appreciation goes to the staff of the Population and Tourism Statistics Unit for their work in compiling this interesting and useful publication. I am certain that this publication will prove useful to a large number of users, including researchers, policy makers, students and the general public.

Reuben Fenech
Director General

Commentary

1. Population

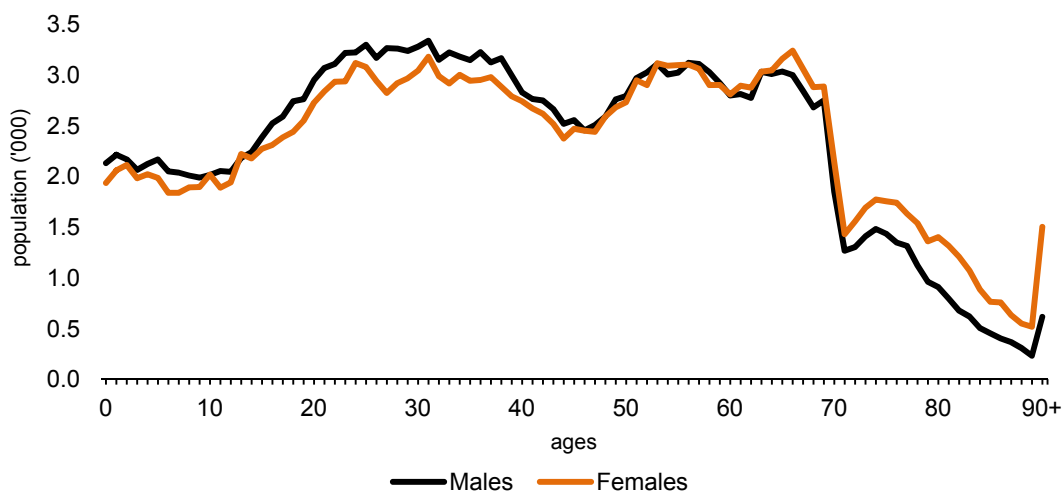

At the end of 2013, the total population of Malta stood at an estimated 425,384 – an increase of 1.0 per cent when compared to the previous year. The majority of the population was constituted of Maltese residents (94.1 per cent) while the remaining 5.9 per cent (24,980) were foreigners. 17.8 per cent of the population were children under the age of 18, while a quarter of the population were persons aged 60 and over.

Chart 1. Percentage population by district: 2013

The Northern Harbour District, once again the largest district in Malta, had an estimated population of 123,663 inhabitants (29.1 per cent of the total population). The smallest district was the district of Gozo and Comino with 7.4 per cent of the total population. The largest localities were Birkirkara, Mosta and St Paul's Bay while the smallest was Mdina with only 236 persons residing.

Chart 2. Total population by single years of age: 2013

2. Births

A total of 4,127 babies were born and registered in Malta during 2013. The majority of these babies (97.7 per cent) were born to mothers who were residing in Malta at the time of birth. The total number of births registered decreased by 2.5 per cent when compared to the previous year, while a decrease of 4.7 per cent was observed in Maltese births being registered. During the year under review, 90.9 per cent of the resident births were of Maltese nationality. During 2013, 28.0 per cent of the babies born to resident mothers were residing in the Northern Harbour District.

Chart 3. Percentage of Maltese registered live births from total registered live births: 2000-2013

Slightly more than half of the babies born to mothers residing in Malta, were born to mothers aged between 30 and 39, while 4.0 per cent were born to mothers aged under 20. Of the babies born to resident mothers, a quarter were born outside wedlock, of which 16.2 per cent, or 167 babies, were registered as having an unknown father. Nearly half of the babies born with an unknown father were born to mothers under the age of 25, while a further 9.0 per cent (15 babies) were born to mothers aged over 35.

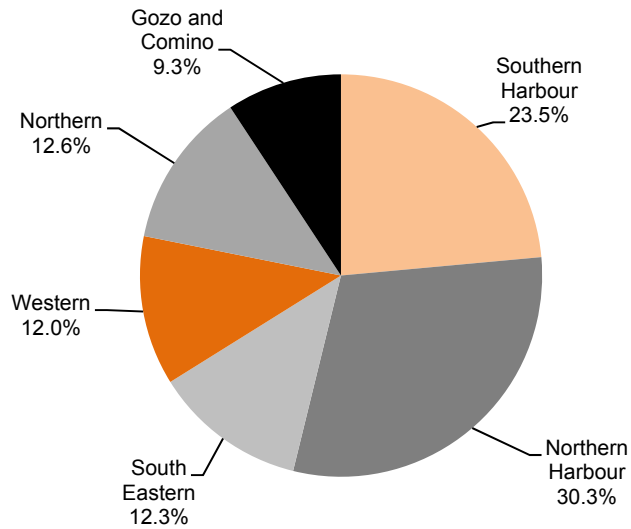

The majority of babies were born to parents who were both born in Malta and have been residing in Malta (81.0 per cent). A further 2.6 per cent of the babies born were born to parents who were both born in the African continent while 2.4 per cent of the babies were born to parents who were both born in other EU member states.

Of the 4,032 babies born to mothers residing in Malta, 96.3 per cent were single maternities. During 2013, there were 74 pairs of twins born. September, October and December 2013 were the most popular months for babies to be born in during the year under review.

3. Deaths

The total number of deaths registered during 2013 stood at 3,236, a decrease of 5 per cent when compared to total number of registered deaths during the previous year. Almost 70 per cent of these deaths took place in hospital. The crude death rate for Malta stood at 7.5 while that for Gozo stood at 9.5 during 2013. The Northern Harbour District registered the largest number of deaths (30 per cent of total registered deaths) while the district of Gozo and Comino registered the smallest number of deaths with 9 per cent of total registered deaths.

Chart 4. Deaths by district: 2013

There were 19 stillbirths in 2013 – a decrease of 5.0 per cent when compared to the previous year. Nearly two thirds of all still born babies weighed more than 1000g. Cases of infant mortality increased from 22 in 2012 to 27 in 2013.

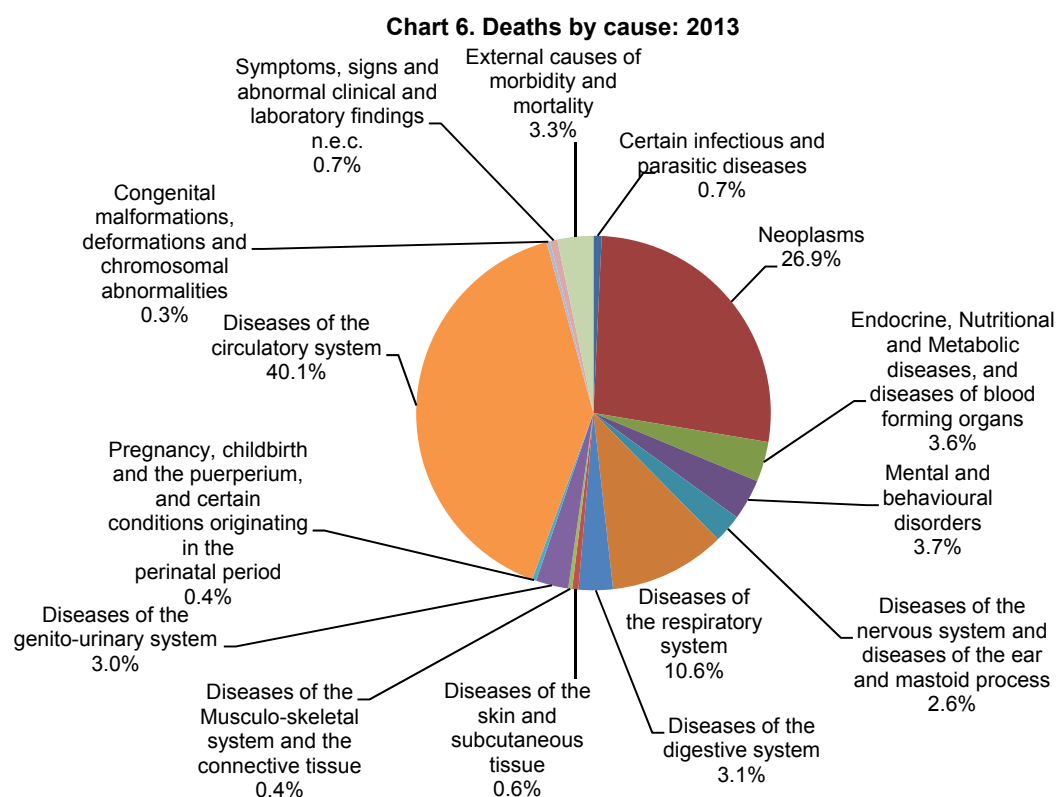

Sixty-five per cent of registered deaths involved persons aged 75 and over. Mortalities of persons aged between 20 and 34 years decreased by 30.4 per cent when compared to the previous year. Deaths of persons aged 35-44 and 45-54 registered decreases of 29.1 per cent and 15.2 per cent respectively. Around 40 per cent of registered deaths occurred during the winter months of January, February, March and December.

Chart 5. Deaths by completed age at time of death: 2013

Forty per cent of all deaths in 2013 were attributed to diseases of the circulatory system while a further 26.9 per cent occurred due to neoplasms. More than half of deaths caused by diseases of the circulatory system were due to ischaemic heart diseases. On the other hand, 17.7 per cent of the deaths caused by neoplasms were due to malignant neoplasm of the trachea, bronchus and lung. A further 10.6 per cent, 3.7 per cent and 3.6 per cent died of

diseases of the respiratory system, mental and behavioural disorders and endocrine, nutritional and metabolic diseases respectively.

4. Family formation and dissolution

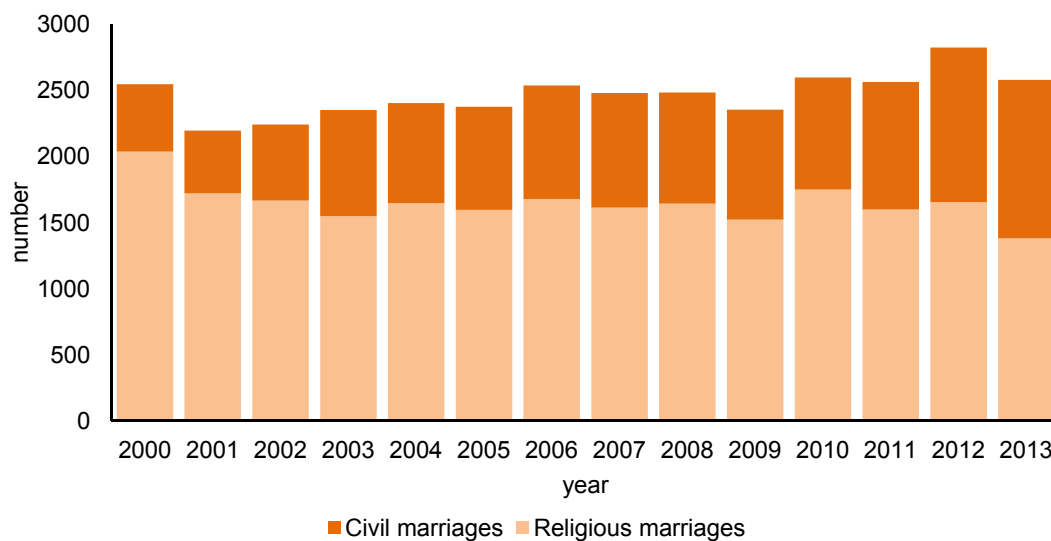

A total of 2,578 marriages were registered in Malta during 2013 – a decrease of 8.7 per cent when compared to the previous year. Civil Marriages accounted for 46.5 per cent of total registered marriages in 2013 as opposed to 41.4 per cent during the previous year. Marriages registered in Malta decreased by 7.9 per cent while marriages registered in Gozo decreased by 18.0 per cent when compared to the previous year. The second quarter of 2013 proved to be the most popular period chosen by spouses, with nearly a third of the total marriages occurring during May and June.

Chart 7. Registered marriages by month: 2013

The majority (89.1 per cent) of all marriages involved brides and grooms who were single before marriage. Of all the grooms married during 2013, 33.9 per cent were aged between 25 and 29 while 28.2 per cent fell within the 30-34 year-old age group. On the other hand, 39.1 per cent of all brides married during 2013 were aged between 25 and 29 while 23.2 per cent were aged between 30 and 34.

Chart 8. Number of marriages registered in Malta and Gozo: 2000-2013

During 2013, 63.0 per cent and 64.5 per cent of brides and grooms respectively were of Maltese citizenship. More than half of the registered marriages took place between two Maltese spouses (56.2 per cent) while 350 couples (13.6 per cent) took place between British couples. Slightly less than three-fourths of both brides and grooms resided in Malta before the marriage while the remaining spouses were residing abroad.

Out of a total 1,199 civil marriage registered during 2013, 45.5 per cent of the marriages involved at least one Maltese spouse. In 59.9 per cent of cases of civil marriages in 2013, both spouses were previously single.

Chart 9. Divorces recognised by Maltese authorities by duration of marriage: 2013

Chart 10. Divorces recognised by Maltese Authorities by country from where divorce was obtained: 2013

A total of 666 separations were registered at the Public Registry during the year under review. The majority (99.2 per cent) of these separations involved at least one Maltese spouse. During 2013, 399 divorces were registered. The majority of the divorces registered (84.7 per cent) were granted by the responsible Maltese authority while a further 8.5 per cent were granted by the responsible British authorities and recognised by Maltese authorities. Of all the divorces recognised during 2013, 82.7 per cent of the cases involved marriages that had lasted for at least ten years. There were 90 annulments granted during 2013 – 56.7 per cent were civil annulments and 43.3 per cent were religious annulments. In 60.0 per cent of the cases, the duration of marriage was of ten years or more.

Chart 11. Registered religious annulments by duration of marriage: 2013

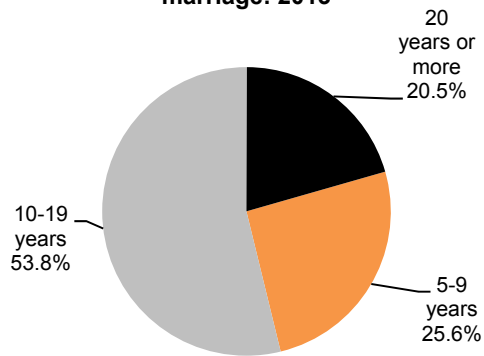

Chart 12. Registered civil annulments by duration of marriage: 2013

5. International Migration

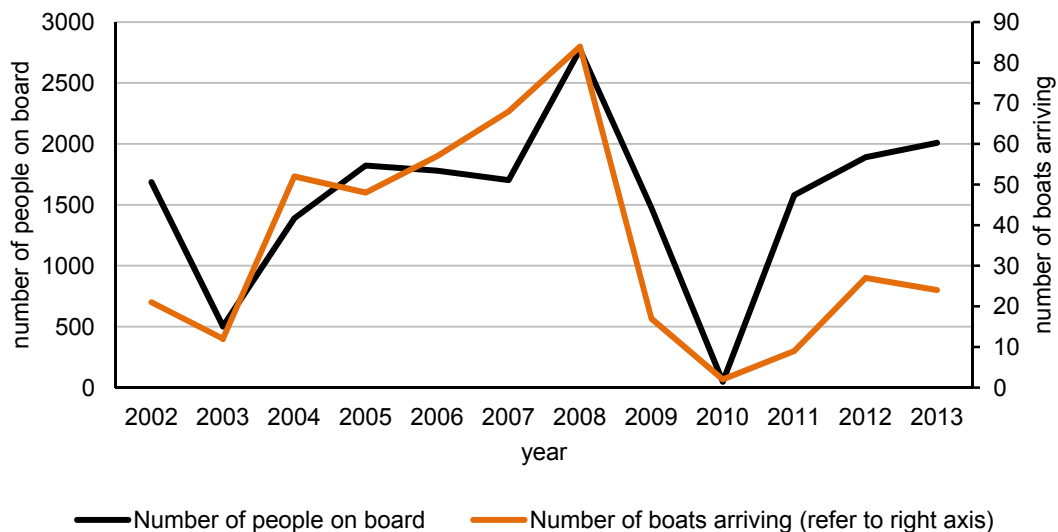

During 2013, an estimated 8,428 persons immigrated to Malta. Less than a quarter of these immigrants were Maltese returned migrants accounting for 21.4 per cent of total immigration figure, while 37.3 per cent of immigrants were EU nationals. The remaining 41.0 per cent were third-country nationals. Nearly two-thirds of immigrants were males with the largest proportion of immigrants being males aged between 20 and 29. On the other hand, an estimated 5,204 persons left Malta during the period under review. Slightly more than a quarter of these emigrants were estimated to be Maltese citizens, while 40.1 per cent and 33.8 per cent were EU nationals and third-country nationals respectively. More males emigrated during 2013 (59.9 per cent) with the largest proportion of emigrants being males aged between 20 and 29 years (20.8 per cent).

Chart 13. Annual estimates of migration flows by country of citizenship: 2013

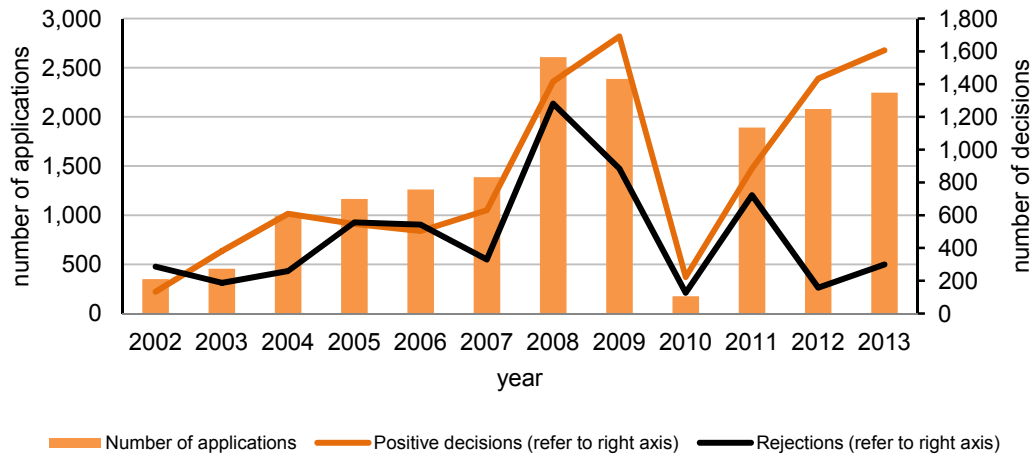

During the year under review, 24 boats carrying irregular migrants reached Maltese shores. These 24 boats carried 2,008 migrants – an increase of 6.2 per cent in persons on board when compared to the previous year. The majority of these persons on board were of African citizenship (88.7 per cent), while the remaining 11.3 per cent were of Asian origin. Almost half of the persons on board were Somali nationals, 23.0 per cent were Eritrean nationals and 8.4 per cent were Syrian nationals.

Chart 14. Boats arriving in Malta with irregular immigrants: 2002-2013

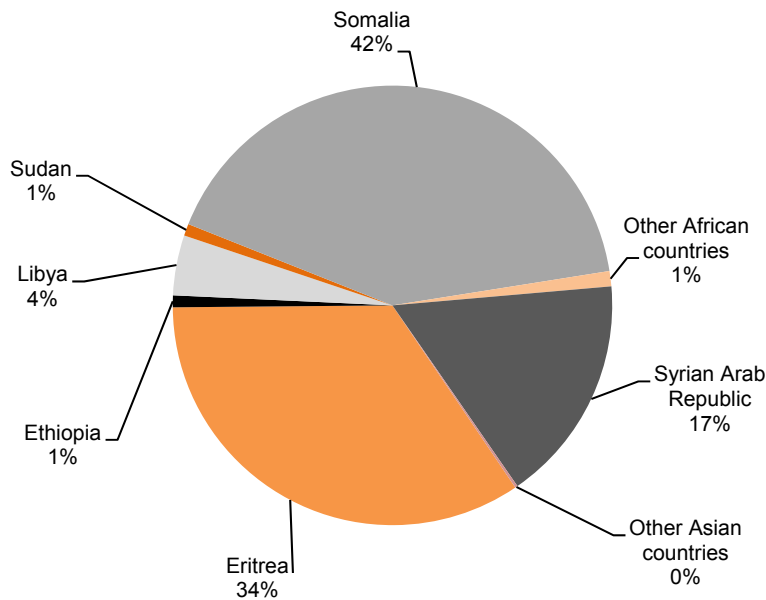

The Office of the Refugee Commissioner received 2,246 applications for asylum during 2013 – an increase of 8.0 per cent when compared to 2012. A third of the applications were submitted in August while July and September also proved to be busy months with 19.5 per cent and 13.0 per cent of applications being submitted respectively. The majority of the applicants were males (83.3 per cent) while the largest proportion of applicants (56.5 per cent) comprised males aged between 18 and 34 years. African applicants made up 87.5 per cent of the applications filed during 2013, while a further 12.4 per cent of the applications being filed by Asian nationals.

Chart 15. Applications and decisions handled by the Office of the Refugee Commissioner: 2002-2013

During 2013, 1,905 cases were decided by the Office of the Refugee Commissioner – an increase of 19.8 per cent when compared to the previous year. The majority of the decisions (84.3 per cent) were positive decisions, of which 43 persons were granted Refugee Status while 1,563 were granted Subsidiary Protection and other forms of protection. Nearly 300 applications were rejected, or 15.7 per cent of all applications submitted. Of all the persons who were granted protection during 2013, 83.1 per cent were African nationals while the remaining 16.9 per cent were Asians. Slightly more than three quarters of the new beneficiaries of protection in 2013 were Somali and Eritrean nationals.

Chart 16. Positive decisions by citizenship: 2013

At the end of 2013, the open centre population totalled at 1,499. The largest proportion of persons residing in open centres and institutional households were living in Hal Far (60.4 per cent). Slightly less than two-thirds of the population were adult males. The majority of residents, or 95.6 of the total, were citizens of African countries (95.6 per cent), of which, 73.8 per cent originated from Eritrea and Somalia.

Chart 17. Third country nationals found to be illegally present and who were subject to an obligation to leave: 2013

Chart 18. Third country nationals found to be illegally present and who actually left Malta: 2013

The police reported 2,437 cases of persons found to be residing in Malta illegally. The majority of these persons were African nationals, with 41.1 per cent of the total being Somali and 19.0 per cent being Eritrean. A further 13.6 per cent were Asian nationals. Persons who were actually returned to their country of origin totalled at 460 during 2013. The majority of persons (60.1 per cent) who returned to their country of origin, were African nationals. Moreover, nearly half of all persons returned were Libyan nationals. A further 20.7 per cent were sent back to Asian countries. The largest proportion of persons found to be residing illegally were males aged between 18 and 34 (56.1 per cent).

There were 1,019 persons who obtained Maltese citizenship through naturalisation or registration during 2013. More than a third of the persons obtaining Maltese citizenship were citizens of European countries with the largest proportion, 15.1 per cent, having British citizenship. Australian nationals accounted for 33.5 per cent of total naturalisations and registrations during the period under review.

Notes:

- (a) All neonatal deaths including those weighing less than 500grams.
- (b) Rate of all deaths of children aged under 4 weeks per 1,000 total resident live births.
- (c) All infant deaths including those weighing less than 500grams.
- (d) Rate of all deaths of children aged under 1 year of age per 1,000 total resident live births.

The column l_x shows, for each sex, the number of persons who would survive to exact age x out of 10,000 born who were subject throughout their lives to the recorded age death rates of the period. Column ${}^o e_x$ is the 'expectation of life', that is the average remaining lifetime for a person who survives at the beginning of the indicated age interval, if likewise subject to those death rates.

6. METHODOLOGICAL NOTES

Methodological Notes

GENERAL DEFINITIONS

Usual residence: refers to the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. This definition is in line with the European Regulation (EC) No. 1260/2013. The following persons alone shall be considered to be usual residents of a specific geographical area:

- those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or
- those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

Usually resident population: refers to all persons who have their usual residence in a Member State at the reference time. Unless otherwise stated, all figures in this publication refer to this reference population.

GENERAL NOTE

Population figures were revised following the results of the Census of Population and Housing 2011, and are in accordance with the 'usual residence' definition.

SECTION 1: POPULATION

All population components are based on definitions provided for in the European Regulation (EU) No. 1260/2013 on European demographic statistics.

Total Population: includes both Maltese and foreign residents. The total population at the end of year t , is computed using the following equation:

$$P_t = P_{t-1} + B_t - D_t + I_t - E_t, \text{ where:}$$

- P_t is the total resident population at the end of year t ,
- P_{t-1} is the total resident population at the end of year $t-1$,
- B_t is the total number of births born to mothers resident in Malta registered during year t ,
- D_t is the total number of deaths of persons resident in Malta registered during year t ,
- I_t is the total immigration of both Maltese and foreign nationals registered during year t who immigrated with the intention to live in Malta for a period of at least 12 months.
- E_t is the total emigration of both Maltese and foreign nationals resident in Malta registered during year t who leave the country for a period of at least 12 months.

Maltese Population: includes Maltese residents only. The Maltese population at the end of year t is computed using the following equation:

$$P'_t = P'_{t-1} + B'_t - D'_t + I'_t - E'_t, \text{ where:}$$

- P'_t is the Maltese resident population at the end of year t ,
- P'_{t-1} is the Maltese resident population at the end of year $t-1$,
- B'_t is the number of Maltese births born to mothers resident in Malta registered during year t ,
- D'_t is the number of deaths occurring to Maltese citizens resident in Malta during year t ,
- I'_t is the total immigration of Maltese nationals registered during year t who immigrated with the intention to live in Malta for a period of at least 12 months.
- E'_t is the total emigration of Maltese nationals during year t who leave the country for a period of at least 12 months.

Maltese and Total mid-year Population: these are calculated by averaging beginning and end-year population estimates.

Population Projections: EUROPOP (EUROpean POPulation projections) are a series of population projections released by Eurostat, the Statistical Office of the European Communities. The latest set of European Population projections refer to the base year 2013, thus short named as EUROPOP2013. EUROPOP2013 is a 'Convergence Trends' scenario that includes short-term (nowcasting), medium-term (trend) and long-term (convergence) components.

Computations are based on a cohort-component method with 1 January 2013 as the base population, disaggregated by sex and age. Data on population, live births and deaths used as input data in the EUROPOP2013 round are official statistics provided by the national statistical authorities to Eurostat in the frame of annual demographic data collection. Migration flows have been measured in terms of net migration (including statistical adjustment) and computed as residual from the annual demographic balance.

As was the case with the previous EUROPOP2010, the convergence year was set to 2150. The 'main input dataset', which defines the frame of the main scenario for producing population projections, includes:

- 2013 base-population;
- assumptions for fertility, mortality and international net migration (including statistical adjustment).
 - a. **Fertility**

The transition starts in 2020 and the model for convergence is linear interpolation between fertility rates in the last observed year and the rates of the ultimate distribution. A constraint on the total fertility rate is set to 1.928.
 - b. **Mortality**

The convergence model is an exponential interpolation between mortality rates in the last observed year and the rates of the ultimate distribution.
 - c. **Total net migration flows**

These are based on the convergence assumption and are computed on the logic adopted in the previous population projections, EUROPOP2010. The convergence model assumes net migration to converge to zero in the convergence year. Intermediate values for the total net migration are obtained by means of a double linear interpolation between net migration levels in the last observed year and zero in the convergence year, the intermediate point being obtained as an average of the last 10 years. In case a country has a negative intermediate point, the convergence is brought forward to 2035 in order to avoid negative net migration for a very long period.

SECTION 2: BIRTHS

Total live births: includes all babies born and registered with the Public Authorities in Malta. Still births are excluded.

Crude birth rate: the number of total live births per thousand mid-year population.

Live births resident in Malta: includes all babies whose parent(s) is(are) resident in Malta at the time of birth. Therefore the definition excludes babies born to mothers who are resident abroad.

Maltese live births: includes all babies born and registered with the Public Authorities in Malta, having a Maltese father or mother if they are born in wedlock, and having a Maltese mother if outside wedlock.

Maltese crude birth rate: the number of Maltese live births per thousand mid-year Maltese population.

Total fertility rate: the number of children that would be born to a woman if she were to live to the end of her child-bearing years, and bear children in accordance with current age-specific fertility rates.

Live-birth order: the numerical order of the live birth being recorded, in relation to all previous live babies born to the mother. In the case of multiple issue, each live-born is counted separately.

Maternities: includes both still and live births. Multiple births are counted as one maternity.

SECTION 3: DEATHS

Total deaths: includes all registered deaths of Maltese and foreign nationals resident in Malta and Gozo. This definition excludes tourists, but includes Maltese residents who die abroad. Total deaths exclude still births.

Crude death rate: the total number of deaths per thousand mid-year total population.

Maltese deaths: includes all registered deaths of Maltese nationals resident in Malta and Gozo. This definition includes Maltese residents who die abroad. Maltese deaths exclude still births.

Maltese crude death rate: the number of Maltese deaths per thousand mid-year Maltese population.

Still births: deaths occurring to babies prior to complete expulsion or extraction from the mother, and having a gestational age of more than 22 weeks.

Neonatal deaths: deaths occurring within the first 28 days after birth.

Infant deaths: deaths occurring during the first year of life.

Infant mortality rate: the number of infant deaths per thousand live births.

Life expectancy at birth: the number of years a newborn is expected to live if mortality in the various age groups remains at the level of the period in which the expectation of life is computed.

SECTION 4: MIGRATION

This domain comprises the compilation of statistics on international migration, as stipulated by Article 3 of the European Regulation (EC) 862/2007. The NSO carries out such work both by using own sources and in collaboration with government entities that provide access to administrative records. This is shown in Table M1:

Table M1. Sources of migration statistics

Entity	Data flows	Data records
National Statistics Office (NSO)	Immigration of Maltese Nationals ¹	Decennial Census of Population and Housing
		Ongoing Labour Force Survey: LFS
	Emigration of Maltese Nationals ²	Ongoing frontier survey: TOURSTAT
Employment and Training Corporation (ETC)	Migration flows of European Union Nationals ³	Employment engagement and termination forms
Office of the Refugee Commissioner	Migration flows of Third-Country Nationals ⁴	Asylum records: REFCOM database
Third-Country Nationals Unit		Resettlements and repatriations
Citizenship and Expatriates Affairs		Residence permits database

¹ Calculations are based on the most recent Census of Population and Housing using the information on the country of residence one year prior to the Census. By using the same question in LFS, the change between the Census reference year and the LFS reference period is observed

² Calculations are based on information collected by TOURSTAT on Maltese nationals travelling from Malta, basing on the past three years. Duration of trips is analysed and the average number of persons whose intention is to stay abroad for 12 months or over is calculated

³ Calculations in respect of immigration of EU Nationals are based on information provided by ETC's engagement forms. This information is linked to termination of employment data in order to remove persons who have not been employed for at least one year. A check is then made with the I.D Card database to remove persons who were registered in Malta prior to the reference year

Calculations in respect of emigration of EU Nationals are based on termination of employment data. Persons who terminated their job and have not been re-employed are considered as emigrants

Calculations in respect of immigration and emigration of EU Nationals' dependants are based on extractions from the most recent edition of the Census of Population and Housing

⁴ Migration of Third-Country Nationals (TCNs) draws on two types of records: Asylum Records and Residence Permits

Asylum Records:

REFCOM is used to extract information on persons, covered by a first-instance decision, who have been granted refugee status, subsidiary protection status or temporary protection status. Emigration of TCNs includes re-settled persons who, following a re-settlement request from UNHCR which is based on such persons' need for international protection, are transferred to a Member State where they are permitted to reside

Residence Permits:

Calculations of immigration of TCNs are based on residence permits that have a duration of at least one year. These are linked with the I.D Card database and ETC records to remove persons who were registered in Malta prior to the reference year. Calculations of emigration of TCNs take into consideration persons whose residence permit has not been extended, and who have had a viable permit for more than one year

Immigration: the action by which a natural person establishes his or her usual residence in a territory of a State for a period that is, or is expected to last, a minimum of 12 months. This figure is measured by summing up the count of all new employment engagement forms and residence permit holders, their dependants, asylum seekers under protection, returned migrants and new adoptions of children from foreign countries.

Emigration: the action by which a natural person leaves his or her usual residence in the territory of the Member State for a period that is, or is expected to last, a minimum of 12 months. This figure is measured by summing up the counts of all employment termination forms which ended during the reference year; residence permit holders who fail to extend their permits during the reference year, together with their dependants; resettled or repatriated asylum seekers who were previously given protection and other Maltese emigrants (i.e. persons who leave the country for a period of at least 12 months).

Asylum applicant: a person who submits an application for international protection to the Office of the Refugee Commissioner.

Application for asylum: the application made by a third-country national or stateless person, which can be understood as a request for international protection from a Member State under the Geneva Convention. Any application for international protection is presumed to be an application for asylum (including requests for refugee status or for subsidiary protection status) unless a third-country national or a stateless person explicitly requests another kind of protection that can be applied for separately. An application for asylum is deemed to have been lodged once a form is submitted by the applicant for asylum, or an authoritative report is received by the competent authorities.

Refugee: a third-country national who, owing to a well-founded fear of persecution for reasons of race, religion, nationality, political opinion or membership of a particular social group, is outside the country of nationality and is unable or, owing to such fear, is unwilling to avail him/herself of the protection of that country. A refugee can also be a stateless person who, being outside the country of former habitual residence for the reasons mentioned above, is unable or, owing to such fear, unwilling to return to that country (Directive 2004/83/EC, Art.2 (d)).

Third-country national: also known as stateless person. Such a person is granted the Geneva Convention status (also referred to as refugee status) if, owing to a well-founded fear of prosecution for reasons of race, religion, nationality, political opinion or membership of a particular social group, is outside the country of nationality and is unable or, owing to such fear, is unwilling to avail him/herself of the protection of that country. A third-country national refers to a Non-EU citizen.

Person eligible for subsidiary protection: a third-country national or stateless person who does not qualify as a refugee but in respect of whom substantial grounds have been shown for believing that the person concerned, if returned to the country of former habitual residence, would face a real risk of suffering serious harm or, owing to such risk, is unable to avail him/herself of the protection of that country.

Person granted authorisation to stay for humanitarian reasons: a person who is not considered to be eligible for international protection, but who is nonetheless protected against removal. In such cases a decision is taken which grants the person concerned authorisation to stay from humanitarian reasons.

Rejected applicant: a person in respect of whom a decision is taken by the responsible national authority to reject an application for international protection.

Unaccompanied minors: third-country nationals or stateless persons below the age of 18, who arrive in the territory of the State unaccompanied by an adult responsible for them, whether such responsibility is in terms of law or custom, and for as long as they are not effectively taken into the care of such an adult. The definition includes minors who are left unaccompanied following their entrance into the territory of the State (Directive 2004/83/EC, Art.2(i)).

Third-country nationals found to be illegally present: persons who are officially found to be in the territory of the State and who do not fulfil, or no longer fulfil, the conditions for stay or residence in the State.

Registration: the action by which foreign residents register themselves as Maltese citizens at the Citizenship and Expatriate Affairs Department. Registered persons are included in the Maltese population count.

Naturalisation: the action by which a foreigner may be granted Maltese citizenship according to the Maltese Citizenship Act.

SECTION 5: FAMILY FORMATION AND DISSOLUTION

Total marriages: marriages registered in Malta and Gozo, including marriages between non-resident foreign spouses.

Crude marriage rate: the number of marriages per thousand mid-year total population.

Civil marriages: non-religious marriages that are recognised by law in Malta.

Separations: information extracted from records held at the Public Registry in Malta and Gozo. This includes separations that involve Maltese and/or foreign spouses and which have been concluded by a legal contract.

Annulments: includes annulments of religious and civil marriages between Maltese and/or foreign spouses, extracted from records held at the Public Registry in Malta and Gozo.

Divorces obtained in Malta: includes divorces that involve both Maltese and foreign spouses. Divorce registration was introduced in Malta at the end of 2011 (Civil Code Amendment Act 2011 (Act XIV of 2011)).

Divorces obtained abroad: includes divorces that involve both Maltese and foreign spouses. The definition is inclusive of divorces that were accepted by the Laws of Malta in terms of Section 33 of the Marriage Act (1975), for which records are held at the Public Registry in Malta and Gozo.

CLASSIFICATIONS

Local Administrative Units

For aggregation purposes, all localities are grouped in six districts, in line with the Local Administrative Unit classification (LAU):

- **Southern Harbour**
Valletta, Senglea, Cospicua, Haż-Żabbar, Fgura, Floriana, Kalkara, Hal Luqa, Marsa, Paola, Santa Luċija, Hal Tarxien, Xgħajra
- **Northern Harbour**
Hal Qormi, Birkirkara, Gżira, Hamrun, Msida, Pembroke, Tal-Pietà, St Julian's, San Ġwann, Santa Venera, Tas-Sliema, Swieqi, Ta' Xbiex
- **South Eastern**
Żejtun, Birżebbuġa, Gudja, Hal Għaxaq, Hal Kirkop, Marsaskala, Marsaxlokk, Mqabba, Qrendi, Hal Safi, Żurrieq
- **Western**
Mdina, Haż-Żebbuġ, Siġġiewi, H'Attard, Hal Balzan, Had-Dingli, Iklin, Hal Lija, Rabat, Mtarfa
- **Northern**
Hal Għargħur, Mellieħa, Mgarr, Mosta, Naxxar, St Paul's Bay
- **Gozo and Comino**
Victoria, Fontana, Għajnsielem and Comino, Għarb, Għasri, Ta' Kerċem, Munxar, Nadur, Qala, San Lawrenz, Ta' Sannat, Xagħra, Xewkija, Żebbuġ

International Standard Classification of Occupations (ISCO)

An internationally harmonised classification used for coding occupations.

International Classification of Diseases (ICD)

An internationally harmonised classification used for coding causes of death.

SOURCES

The source for births, marriages, marital separations, annulments and divorces is the Public Registry in Malta and Gozo.

Sources for maternities are the Public Registry and the Directorate for Health Information and Research (DHIR).

The source for deaths is the Directorate for Health Information and Research (DHIR).

In addition to the information given in Table M1, the Agency for the Welfare of Asylum Seekers (AWAS) and the Immigration Section of the Police General Headquarters provides statistics on migration.
