Methodological Notes

1. The nomenclature of territorial units for statistics (NUTS) provides a single, uniform breakdown of the economic territory of the European Union. The NUTS is the territorial classification used in the compilation of regional accounts. The economic territory of a country can be divided into regional territories and extra-regio territory. For the purpose of regional accounts, Malta is divided as follows:

NUTS 0	NUTS I	NUTS II	NUTS III
MT			Malta
	MT0		Malta
		MT00	Malta
			<i>MT001</i> Malta
			<i>MT002</i> Gozo and Comino
	MTZ		Extra-Regio
		MTZZ	Extra-Regio
			<i>MTZZZ</i> Extra-Regio

Regional territory includes the region that is part of the geographic territory of a country and any free zones, including bonded warehouses and factories under customs control in the region. Extra-regio territory is made up of parts of the economic territory of a country that cannot be attached directly to a single region.

2. All data in this publication are provisional and subject to revision.
