## **About the Artist**

Joe Pace Ross was born in 1938 and spent his professional life in banking, initially with Barclays Bank in 1955 and eventually with Mid-Med Bank. Following his retirement in 1999, he has been able to dedicate more time to painting. As a self-taught artist having no formal training in water colour painting, he developed his technique through reading and observation, discussing various methods and effects with his artist friends.

His preferred subjects are the local bays and harbours with their clusters of multi-coloured boats, and the Maltese Luzzu in a serene sea full of reflections. His current works are exhibited at the Sistina Art Gallery in Gżira.

## KEY FACTS ABOUT MALTA IN 2008

Area	316 km <sup>2</sup>
Population	413,609
Population density (persons per sq. km.)	1,309
Live births	4,126
Crude birth rate	10.0
Marriages	2,482
Crude marriage rate	6.0
Deaths	3,243
Crude death rate	7.9
Licensed road vehicles/1,000 inhabitants	712.4
Road casualties/1,000 inhabitants	2.8
GDP (at market prices)	€ 5,758.8 million
Balance of Payments current account	- € 317.0 million
Unemployment rate	6.1%
Imports	€ 3,404.0 million
Exports	€ 2,030.7 million
Total manufacturing sales	€ 2,207.7 million
Tourist arrivals	1.3 million
Average tourist length of stay	8.5 nights
Rainfall	476.0mm
Registered medical practitioners	1,374

## FOREWORD

A country's profile may be portrayed in more ways than one. However, in almost all cases, statistics – directly or indirectly – form an integral part of such profiles. *Malta in Figures 2009* is a pocket book which provides an informative, up-to-date insight on Malta in a numerical way. The subjects treated are all cornerstones of Maltese life today and include the economy, its demography, its environment and its geography.

Some figures hardly ever change. In terms of land area and population, Malta is the smallest country in the European Union, and the most densely-populated one too. Owing to its strategic location in the heart of the Mediterranean Sea, Malta has always been a trading nation, with substantial import and export flows. Other figures are more dynamic, and show significant pointers to the changing face of Maltese life today. Demographic and social statistics, together with data on our quality of life, are just two examples.

Statistics are there to be made use of, and publications such as this pocket book are designed to render them accessible to a wide net of users. I am confident that this compact publication, covering a range of statistical topics, will prove useful to a diverse audience. Our thematic publications and regular news releases, which may be freely accessed through our website, provide further in-depth data on the statistics found in this issue.

I would like to thank all NSO staff members for their contribution towards this year's edition of *Malta in Figures*.

Michael Pace Ross  
Director General  
August 2009

## List of country codes for EU Member States and Candidate Countries

Austria	AT
Belgium	BE
Bulgaria	BG
Cyprus	CY
Czech Republic	CZ
Denmark	DK
Estonia	EE
Finland	FI
France	FR
Germany	DE
Greece	EL
Hungary	HU
Ireland	IE
Italy	IT
Latvia	LV
Lithuania	LT
Luxembourg	LU
Malta	MT
Netherlands	NL
Poland	PL
Portugal	PT
Romania	RO
Slovak Republic	SK
Slovenia	SI
Spain	ES
Sweden	SE
United Kingdom	UK

### Candidate countries to European Union

Croatia	HR
The former Yugoslav Republic of Macedonia <sup>1</sup>	MK
Turkey	TR

### Member States of the European Free Trade Association (EFTA)

Iceland	IS
Liechtenstein	LI
Norway	NO
Switzerland	CH

<sup>1</sup> The code MK is provisional and does not prejudice in any way the definitive nomenclature for this country, which will be agreed following the conclusion of negotiations currently taking place on this subject at the United Nations.

## NACE categories

Code	Category
A	Agriculture, hunting and forestry
B	Fishing
C	Mining and quarrying
D	Manufacturing
E	Electricity, gas and water supply
F	Construction
G	Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods
H	Hotels and restaurants
I	Transport, storage and communication
J	Financial intermediation
K	Real estate, renting and business activities
L	Public administration and defence; compulsory social security
M	Education
N	Health and social work
O	Other community, social and personal service activities
P	Private households with employed persons

### **Symbols used for data**

The colon (:) is used in tables to represent data that is not available, either because the value was not provided by the data supplier or because the value is confidential. A dash (-) is used to indicate values that are not relevant or not applicable. The letter P (p) in superscript is used to indicate provisional data and the letter U (u), also in superscript, is used to represent under-represented data.

## GEOGRAPHICAL DATA AND LAND COVER

**Table 1. MALTA: geographical data**

Situation	Area		
Northern latitude 36° 00' 00"	Malta	245.728	square kilometres

<sup>1</sup> PPS is the artificial common reference currency unit used in the EU to express the volume of economic aggregates for the purpose of spatial comparisons - the basic figures are expressed in PPS, i.e a common currency that eliminates the differences in price levels between countries allowing volume comparisons between countries

<sup>2</sup> GDP in terms of current prices, expressed in millions of PPS (Purchasing Power Standards). Expressing GDP in PPS (Purchasing Power Standards) eliminates differences in price levels between countries, and calculations on a per head basis allows for the comparison of economies significantly different in absolute size

<sup>3</sup> This is the volume index of GDP per capita in Purchasing Power Standards (PPS); it should be noted that this indicator has been rescaled i.e. data is now expressed in relation to the European Union average set to equal 100 (EU27=100); thus they are not comparable with data based on EU25 = 100. The per capita volume index represents the real volume of GDP in per capita terms in relation to the European Union (EU27) average set equal 100

<sup>f</sup> Forecast

## Methodological Notes

1. Tables 65 to 67 are compiled by means of a sample survey, covering an average of 390 manufacturing enterprises, requesting employment, wages and salaries, turnover and investment data. The results are compiled in quarterly reports and published in accordance with NACE Rev 1.1 (the statistical classification of economic activities in the European Community).
2. It is important to note that some enterprises may have changed their main production activities and a re-classification of these enterprises according to their new activity was carried out. This resulted in a shift of enterprises to and from different manufacturing sectors, the exclusion of some enterprises from manufacturing activities and even in the amalgamation of sectors.
3. As from 2007, no tobacco operations were recorded in sector 15/16 - Food and Beverages; Tobacco. Furthermore, in Sector 35 (Other Transport Equipment), the Malta Shipyards is excluded from the sample throughout the whole time series.
4. SUMMARY DEFINITIONS OF KEY VARIABLES:

**Employment:** this covers all persons employed, regardless of whether they are full-time or part-time, and includes paid employees as well as working proprietors and unpaid family workers. The total employment for each quarter in the manufacturing sectors refers to the end-of-month figures at the end of every calendar quarter, i.e. March, June, September and December.

**Gross Wages and Salaries:** are inclusive of all basic wages and salaries payable at regular intervals, overtime, night shift and other allowances, bonuses and commissions. Employers' social security contributions are excluded.

**Total Sales:** is made up of all local sales, which are exclusive of VAT and exports on a FOB basis. The export sales are based on: (a) the customs declarations to countries that are not European Union (EU) Member States and on (b) the Supplementary Declaration that traders in merchandise goods must submit in respect of dispatches (exports) of good to the member states of the EU.

**Investment:** refers to new investment during the reference period. These are tangible capital goods for own company use but not for speculative use. They have a useful life of more than one year. Any additions, alterations, improvements or renovations prolonging the service life or to increase the productive capacity of capital goods are not taken into account. Excluded from the definition are current maintenance costs as well as investment in capital goods used under rental and lease contracts, intangible goods (patents, trade marks), financial assets and goods acquired through mergers. Computer software is regarded as investment if its life is over one year and if its amount is of a relatively considerable amount.

5. Status of the data:

The survey data are not grossed up to the total population, and may therefore differ from National Accounts data. In the case of non-respondents, imputations were carried out. The data should be considered as provisional and therefore subject to revision.

Cut-off date for data presented: 6 May 2009
