Prices

Retail Prices Index - June 2005

In June 2005, the Retail Prices Index went down by 0.04 per cent to 106.65 from 106.69 in the previous month.

The Food Items Index decreased by 1.05 per cent to 103.92 from 105.02 in May as a result of average price decreases in respect of unprocessed potatoes and vegetables. Price increases were recorded for frozen meat, fresh fish and fresh fruits.

The Beverages and Tobacco Index increased by 0.39 per cent to 114.42 from 113.98. Higher average prices for non-alcoholic and served beverages were registered.

The Clothing and Footwear Index registered an increase of 0.07 per cent to 95.06 from 94.99 in the previous month. Higher average price increases were recorded for girls' outerwear, while price drops for women's outerwear were registered.

The Housing Index went up to 111.57, a rise of 0.12 per cent from the previous month. Higher average prices for electricity equipment and miscellaneous articles were registered. However, lower average prices for materials for plastering, cement rendering were recorded.

At 103.58, the Household Equipment and House Maintenance Cost Index rose by 0.41 over May. Price increases were recorded in respect of carpets, household textile articles, household appliances and glassware, tableware and household utensils.

At 108.19 the Transport and Communication Index registered an increase of 0.57 per cent over the previous month. Higher average prices for sea and air transport services were registered. Lower average prices for motor cars were recorded.

The Recreation and Culture Index went up by 0.04 per cent to 101.57. Price increases were recorded for sports equipment. However, a decrease in audio visual equipment was registered.

Inflation Rate

In June the inflation rate stood at 2.94 per cent ■

Methodological Notes

1. A new Retail Prices Index series, with base December 2002, was officially introduced as from January 2003. Price quotations in respect of the goods and services in this new index series started being collected in January 2002. As a result the NSO was in a position to compile the new index series as from January 2002. This new index series may be linked to the old index series by using a linking coefficient of 1.1914.
2. The index is compiled using a large and representative selection of more than 355 separate goods and services for which price movements are regularly measured in 30 localities throughout the country. Around 9,000 separate price quotations are used each month in compiling the index.
3. The Retail Prices Index is the main measure of inflation in Malta. It measures the average change from month to month in the prices of goods and services purchased by most households in Malta. The spending pattern on which the index is based was derived from the Household Budgetary Survey 2000/1.
4. Each monthly News Release on the Retail Prices Index shall include three different measures of inflation as follows:
 - (a) The **monthly rate** compares price levels between the two latest months. Although up-to-date, this can be affected by seasonal and other effects.
 - (b) The **annual rate** measures price changes between the current month and the same month of the previous year. This measure is responsive to recent changes in price levels but can be influenced by one-off effects in either month.
 - (c) The **12-month average rate**, used officially in Malta, overcomes the volatility of the previous two rates by comparing average Retail Prices Indices in the latest 12 months to the average of the previous 12 months. This measure is less sensitive to transient changes in prices.
5. The data in this release are not normally subject to revision.
6. More information on the Retail Prices Index is available from the NSO website at www.nso.gov.mt.
