27 November 2005

The monthly calendar of NSO News Releases may be consulted on the Office's website at www.nso.gov.mt

International trade

Unit Value Indices

In the third quarter this year, the All Commodities imports unit value index increased by 3.92 per cent to 93.75 from 90.21 in the same quarter last year.

The Food and Live Animals index increased by 4.18 per cent to 120.68 from 115.84 last year. At 102.41, the Beverages and Tobacco index declined by 1.98 per cent. The Mineral Fuels Index surged by 58.4 per cent to 173.90 from 109.79 in the third quarter last year. At 152.54, the Animal and Vegetable Oils and Fats index increased by 15.18 per cent over last year. The imports unit value index for the Semi-Manufactured Goods category increased by 5.55 per cent to 124.09.

In the third quarter this year, the Machinery and Transport Equipment imports unit value index dropped by 3.54 per cent to 57.75 from 59.87 in the same quarter last year. At the same time, the index for the Miscellaneous Manufactured Articles commodity group dropped by 2.74 per cent to 123.66 from 127.14 in the same period last year.

Export Prices

In the third quarter this year, the All Commodities exports unit value index dropped by 6.94 per cent to 68.66 from 73.78 in the comparable quarter last year.

Except for the Chemicals group, all export commodity groups recorded a downward pressure on their export prices. The Food and Live Animal index dropped by 20.46 per cent to 71.38 from 89.74 last year. The Beverage and Tobacco index declined by 17.60 per cent to 297.87 from 361.48 in the third quarter last year. At 101.71, the Crude Materials index dropped by 12.45 per cent when compared to last year. The Semi-Manufactured Goods index recorded an average drop of 5.40 per cent in its index that declined to 98.79 in the quarter under review. At the same time the Machinery and Transport Equipment index went down by 7.29 per cent to 58.24 from 62.82 in the third quarter last year. At 95.44, the Miscellaneous Manufactured Articles index dropped by 1.0 per cent when compared to the same quarter last year.

Terms of Trade

In the first nine months this year, our terms of trade for merchandise goods continued to deteriorate. The terms of trade index dropped to 69.92 in September. On an annual basis, the terms of trade index declined by 10.5 per cent to 71.6 in the third quarter this year from 80.0 in the comparable quarter last year ■

Methodological Notes

1. Import and Export Unit Value Indices are compiled monthly, quarterly and annually on the basis of either the Customs or Supplementary merchandise trade declarations.
2. A chain-linked Laspeyres index methodology, whereby each previous year is established as a base period is being applied. Weights are revised every year.
3. Monthly and quarterly indices are compiled by comparing the relative average unit values to the annual unit values in the base period.
4. Unit value indices are used to approximate import and export price movements. Although indicative of price changes, these indices are limited by the heterogeneity of the products classified under the same group.
5. The Terms of Trade show a country's export prices relative to its import prices. It is expressed as an index that is calculated by dividing the exports units price value index by the imports unit price value index. A rise in the index implies an improvement in a country's terms of trade, making it possible to purchase more imports with the same amount of exports. An improvement in a country's terms of trade occurs when export prices rise, when import prices fall, when export prices rise at a faster rate than import prices, or when export prices fall at a slower rate than import prices. A fall in the index occurs when a country's terms of trade deteriorate. It is necessary to export more to purchase the same amount of imports. A deterioration occurs when import prices rise, when export prices fall or when import prices rise at a faster rate than export prices, or when import prices fall at a slower rate than export prices.
6. All current monthly, quarterly and annual data should be considered as provisional and therefore subject to change. Revisions of monthly, quarterly and annual data are normally carried out in the two-year period following each reference period.
