Prices

Retail Prices Index - November 2005

In November this year, the Retail Prices Index went up by 0.56 per cent to 109.01 from 108.40 in October.

The Food Item Index decreased by 0.21 per cent to 104.86 from 105.08 in the previous month as a result of average price drops in respect of fresh fruits and vegetables. Average price increases for frozen meat, poultry and rabbit meat, prepared and processed meat, fresh fish and cheese were registered.

The Clothing and Footwear Index rose up by 1.98 per cent to 97.53 from 95.64 in October. Higher average prices were recorded for men's, women's, boys' and girls' outerwear, girls' underwear/swimwear and women's footwear.

At 112.26, the Housing Index went up by 0.21 per cent from 112.03 in the previous month. Price increases for rentals were registered.

Increased prices for water and electricity and liquid fuels pushed up the Water, Electricity, Gas and Fuels Index by 26.86 per cent to 152.43 from 120.16 in the previous month.

The Household Equipment and House Maintenance Cost Index registered an increase of 0.52 per cent to 104.39 from 103.85 in October. Higher prices for household textile articles and household appliances were recorded.

Lower average prices for fuels and air transport services pulled down the Transport and Communications Index by 1.30 per cent to 112.02 from 113.49 in the previous month. However, price increases for motor cars were registered.

The Personal Care and Health Index increased by 0.50 per cent to 112.85. Average price increases were recorded in respect of medicines and therapeutic appliances and equipment.

The Other Goods and Services Index went up by 0.19 per cent to 115.42 from 115.20 in October. Higher prices for jewellery, watches and clocks and non-durable household goods were recorded.

Inflation Rate

In November the inflation rate stood at 2.95 per cent ■

Methodological Notes

1. A new Retail Prices Index series, with base December 2002, was officially introduced as from January 2003. Price quotations in respect of the goods and services in this new index series started being collected in January 2002. As a result the NSO was in a position to compile the new index series as from January 2002. This new index series may be linked to the old index series by using a linking coefficient of 1.1914.
2. The index is compiled using a large and representative selection of more than 355 separate goods and services for which price movements are regularly measured in 30 localities throughout the country. Around 9,000 separate price quotations are used each month in compiling the index.
3. The Retail Prices Index is the main measure of inflation in Malta. It measures the average change from month to month in the prices of goods and services purchased by most households in Malta. The spending pattern on which the index is based was derived from the Household Budgetary Survey 2000/1.
4. Each monthly News Release on the Retail Prices Index shall include three different measures of inflation as follows:
 - (a) The **monthly rate** compares price levels between the two latest months. Although up-to-date, this can be affected by seasonal and other effects.
 - (b) The **annual rate** measures price changes between the current month and the same month of the previous year. This measure is responsive to recent changes in price levels but can be influenced by one-off effects in either month.
 - (c) The **12-month average rate**, used officially in Malta, overcomes the volatility of the previous two rates by comparing average Retail Prices Indices in the latest 12 months to the average of the previous 12 months. This measure is less sensitive to transient changes in prices.
5. The data in this release are not normally subject to revision.
6. More information on the Retail Prices Index is available from the NSO website at www.nso.gov.mt.
