## Methodological Notes

1. Tourist air departures are collected through a continuous survey carried out at the departure lounge of Malta International Airport. A two-stage sample design is used for this survey. At the first stage alternate days are selected. Then within each shift a sample of passengers is selected systematically. Personal interviews are carried out. Monthly response rates of around 90 per cent are achieved.
2. Tourist sea departures are collected through a regular survey that is carried out at the seaport. Ferry sailings on every alternate day are selected. Departing passengers are interviewed personally. On average a response rate of 93 per cent is recorded for this survey.
3. The variables collected in these surveys include the following:

Nationality	Number of nights stayed
Country of residence	Locality in Malta stayed longest
Flight/Sailing	Organisation of trip
Final destination	Form of transport used
Purpose of visit	Expenditure (package/non-package/other)
Frequency of visit	Age
Gender	
4. The expenditure data contained in this release should not be equated to national tourism earnings. Such expenditure includes elements that are earned by enterprises outside the Maltese economic territory.
5. The surveys carried out at the airport and the seaport are grossed up using the monthly passenger departures data in respect of each port after removing the number of transit passengers from the data sets. The monthly passenger departures data published by the Malta International Airport cannot be equated to tourism statistics because the former is inclusive of departing Maltese and transit passengers. As a result, the monthly tourism statistics published by the NSO are always lower than the combined passenger departures data available from the airport and seaport.
6. Definitions

**Usual Environment** consists of the direct vicinity of his/her home and place of work and other places frequently visited

**Visitors** comprise tourists and same-day visitors. Visitors are distinguished from other travellers according to the following criteria:

- The trip should be to a place other than that of the usual environment.
- The stay in the place visited should not last more than 12 consecutive months.
- The main purpose of visit should be other than the exercise of an activity remunerated from within the place visited.

**International tourist** satisfies the criteria mentioned earlier regarding visitors. Additionally, international tourists must stay at least one night in a collective or private accommodation in the country visited.

**International same-day visitor** is an international visitor who does not spend at least one night in collective or private accommodation.

7. The data in this release are not normally subject revision.
