Tourism

Departing tourists: September 2008

Inbound tourists in September 2008 are estimated to have decreased by 2.7 per cent when compared to the same month in 2007. Year on year, total nights spent increased by 2.6 per cent.

September 2008

According to the ongoing frontier survey, tourist departures in September are estimated at 139,794, implying a decrease of 2.7 per cent over the same month in 2007. The increase reflects primarily a rise in the Dutch, Italian and German markets, while tourists coming from UK, France and Spain registered decreases (see Table 5). Results also show that 84.9 per cent of inbound tourists in September came to Malta on holiday.

Meanwhile, total nights spent increased by 2.6 per cent when compared to the same month in 2007. Year on year, total nights spent in private accommodation increased by 37.6 per cent, while the collective accommodation category registered an drop of 10.4 per cent. Overall, the average length of stay is calculated at 9.3 nights, up by 0.5 nights when compared to September 2007.

January-September 2008

Inbound tourists for the first nine months of 2008 are estimated at 1,045,168, implying an increase of 7.8 per cent over the corresponding period a year ago. In absolute terms, the growth is mostly attributable to an increase in holiday visits, mainly from the German, Italian and Spanish markets. On the other hand decreases were recorded in the British, American and Libyan markets.

Table 6 shows that 88.2 per cent of all inbound visits comprised tourists coming from EU Member States. Although there was an increase in repeat tourism, data show that the overall increase in the period under review was mainly brought about by a rise in first-time visits, with the latter estimated to account for 70.1 per cent of total visits. The largest age bracket comprised tourists aged 25-44, followed by those in the 45-64 age bracket.

Total nights spent increased by 4.8 per cent when compared to the same period in 2007. Nights spent in private accommodation registered an increase of 9.6 per cent, while guest nights in collective accommodation increased by 2.9 per cent. With regard to collective accommodation, the 5- and 4-star hotel categories increased respectively by 6.6 and 2.9 per cent, while the 3-star category recorded a drop of 11.2 per cent. The average length of stay is calculated at 8.8 nights, down by 0.3 nights when compared to last year's level.

In the period under review, total tourist expenditure is estimated at €854.7 million, registering a marginal increase over the same period in 2007. The growth in non-package and other expenditure was contrasted by a reduction in package expenditure.

The survey results indicate that the per capita total expenditure is estimated at €829, down by 8.0 per cent when compared to the corresponding period last year ■

^w stands for weighted average - further detail can be looked up in the methodological notes - Methodological Note 6

Methodological Notes

1. The results in this release are based on the ongoing frontier survey known as TOURSTAT. All the detailed distribution is survey-based. Administrative records are used as a supplementary source for the calibration of the survey aggregates. The exercise is in the main a bottom-up approach including a calibrating weight to re-align the survey results to the true population of total passenger departures (net of transits). Yet we advise our users to exercise caution when analysing details that involve estimates of less than 1,000 tourists since such estimates may suffer from variations attributable to low frequency in the sample frame (sampling errors). There are also limitations related to non-sampling errors, namely those linked to respondents' likelihood and willingness to provide proper information and those related to language barriers.
2. Tourist air departures are collected through a continuous survey carried out at the departure lounge of Malta International Airport (MIA). A two-stage sample design is used for this survey. In the first stage alternate days are selected. Then within each shift a sample of passengers is selected systematically. Personal interviews are carried out. Monthly response rates of around 90 per cent are achieved.
3. Tourist sea departures are collected through a regular survey that is carried out at the Valletta International Seaport Terminal (VISET). Ferry sailings on every alternate day are selected. Departing passengers are interviewed personally. On average a response rate of 93 per cent is recorded for this survey.
4. The main variables collected in these surveys include the following:

| | |
|----------------------|---|
| Nationality | Number of nights stayed |
| Country of residence | Type of accommodation used |
| Flight/Sailing | Locality in Malta stayed longest |
| Final destination | Organisation of trip |
| Sex and age | Form of transport used |
| Purpose of visit | Expenditure (package/non-package/other) |
| Frequency of visit | |
5. The expenditure data contained in this release should not be equated to national tourism earnings. Such expenditure includes elements that are earned by enterprises outside the Maltese economic territory.
6. The total per capita expenditure is a weighted average of the 'package' and 'non-package' expenditure categories based on the respective number of tourists in each category, plus the simple average of the 'other expenditure' categories.
7. The monthly passenger departures data published by the Malta International Airport cannot be equated to departing tourists because the former is inclusive of departing Maltese and transit passengers. As a result, the monthly tourism statistics published by the NSO are always lower than the combined passenger departures data available from the airport and seaport.
8. **Definitions:**

Usual environment of a person consists of the direct vicinity of his/her home and place of work or study, and other places frequently visited.

Visitors comprise tourists and same-day visitors. Visitors are distinguished from other travellers according to the following criteria:

 - the trip should be to a place other than that of the usual environment;
 - the stay in the place visited should not last more than 12 consecutive months;
 - the main purpose of visit should be other than the exercise of an activity remunerated from within the place visited.

International tourist satisfies the criteria mentioned earlier regarding visitors. Additionally, international tourists must stay at least one night in a collective or private accommodation in the country visited.

International same-day visitor is an international visitor who does not spend at least one night in collective or private accommodation.
9. The data in this release are not normally subject to revision.
