

23 January 2014 | 1100 hrs | 015/2014

As at the end of June 2013, the Maltese economy recorded an estimated net international investment position of €1.64 billion.

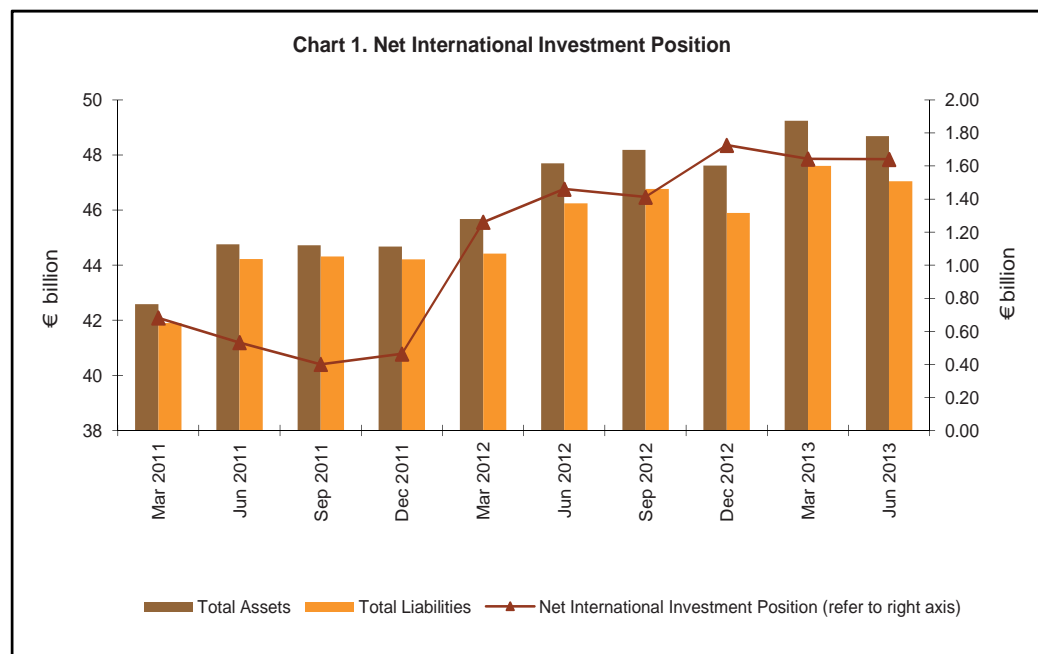

International Investment Position of Malta as at end June 2013

Cut-off date:
10 January 2014

Compared to June of the previous year, in June 2013 total foreign assets increased by €0.98 billion. Total foreign liabilities increased by €0.80 billion during the corresponding period, resulting in an overall increase in the International Investment Position (IIP) of €0.18 billion.

Malta's total foreign assets abroad (Chart 2) amounted to €48.69 billion as at end of June 2013. Other Investment accounted for 53.5 per cent, while Portfolio Investment represented 42.9 per cent of total foreign assets. The improvement in Malta's foreign assets was mainly driven by a €1.47 billion increase in debt securities, primarily bonds and notes. This was partly offset by a €0.55 billion decline in Other Investment mainly due to a fall in loans generated by the banking sector.

At the end of June last year, Malta's foreign liabilities (Chart 3) were estimated at €47.05 billion. Accounting for 73.7 per cent of total foreign liabilities, Other Investment went up to €34.69 billion from €33.32 billion in June 2012. The increase was mainly attributed to an increase in loans to the Monetary Authorities. Foreign direct investment, representing 24.3 per cent of total foreign liabilities, declined to €11.42 billion from €11.98 billion a year earlier ■

Methodological Notes

1. The National Statistics Office (NSO), with the cooperation of the Central Bank of Malta (CBM), is responsible for the collection, compilation and presentation of both the International Investment Position (IIP) as well as the Balance of Payments (BoP) statements of Malta. Both statements are compiled in accordance with the international guidelines provided in the fifth BoP Manual of the International Monetary Fund (IMF) as well as with the guidelines drawn up by Eurostat, the European Union statistical agency.
2. The IIP is compiled periodically to show the position of foreign assets and liabilities, by instrument, at the end of a particular period. These are classified under direct investment; portfolio investment; financial derivatives; other investment; and reserve assets.
3. The IIP at the end of a specific period reflects the financial transactions, valuation changes, and other adjustments, denoted by instrument.
4. Data are collected through a direct reporting (DR) survey covering all sectors of the economy, excluding the household sector. The latter is based on administrative data, which is also used to complement the DR system.
5. Data are provisional and are subject to change.
6. As from January 1 2008, following Malta's entry into the euro area, a reclassification of the external reserves of the country has been carried out. This meant that as from this date, all cross-border claims that Malta has within the euro area as well as all claims that the country has in euro-denomination are no longer considered as being part of Malta's reserve assets. In addition, as happened in other euro area Member States, Malta has transferred a fraction of its external reserves to the European Central Bank (ECB) in exchange for a claim on the ECB; which, being an intra-Eurosystem asset, is also not considered as being part of the country's external reserves.

Note: In 2014, the Balance of Payments and the International Investment Position will be compiled based on the guidelines of the Balance of Payments Manual (Sixth Edition), as recently published by the IMF. This will result in several instruments being presented in a different format. Moreover, special purpose entities (SPEs) will also start to feature in the Statement. The updated compilation will lead to significant changes in the current statements.
