

7 April 2014 | 1100 hrs | 064/2014

In February, the number of persons registering for work with the Employment and Training Corporation (ETC) stood at 7,753, compared to 7,279 in the corresponding month last year.

## Registered Unemployed: February 2014

Data provided by the Employment and Training Corporation (ETC) for February indicate an increase of 537 persons registering under Part 1 and a decline of 63 among those registering under Part 2 of the unemployment register, when compared to the corresponding month last year.

The number of registrants aged 45 and over went up by 6.2 per cent, to 3,186. Increases were recorded among all age-groups except for persons aged below 20.

When compared to February 2013, an increase of 593 persons was recorded among those who had been registering for more than one year. On the other hand, the number of persons who had been registering for less than 21 weeks declined by 98. The number of disabled persons registering for work numbered 535, decreasing by 5.0 per cent over 2013. Males accounted for 83.6 per cent of the total number of registrants with disabilities.

### Registered unemployment rate: October 2013

Excluding part-time employment (refer to methodological notes), the registered unemployment rate during the month under review stood at 4.6 per cent of the labour supply, and varied from 5.4 per cent among men to 3.2 per cent among women ■

## Methodological Notes

1. This news release provides statistics on the number of persons registering for work with the Employment and Training Corporation (ETC). These administrative records provide counts of persons who are registered with ETC in pursuit of employment.

The National Statistics Office also publishes, on a quarterly basis, another set of statistics on unemployment based on the Labour Force Survey (LFS). When compiling LFS statistics, the Office adopts the International Labour Organisation (ILO) definition, an internationally agreed definition on unemployment. This definition has also been adopted by Eurostat and is used by all EU Member States. More details regarding the methodology used for the compilation of unemployment statistics from the LFS may be found in quarterly LFS news releases.

Since ETC records and LFS results measure two different facets of unemployment, these are not comparable. Users are therefore cautioned that these two sets of statistics should not be used interchangeably.

2. The data in this release are final and not normally subject to revision.
3. The monthly unemployment rates from November 2013 to February 2014 do not feature in this release since the administrative data on the labour supply for these months are not out yet available.
4. As from this release, ISCO 08 is being used to classify occupations sought by the unemployed. This new classification was applied by ETC for data relating to October 2013 onwards.

5. Definitions:

- **Unemployment rates:** in computing the unemployment rates for the purpose of this release, only the full-time gainfully occupied population is taken into consideration. Persons employed on a part-time basis were not taken into account in this computation.
- The **registered unemployment rate:** is worked out by taking into account the number of registered unemployed persons both under Part 1 and Part 2 as a percentage of the sum of the full-time gainfully occupied population and the total registered unemployed.
- **Long-term unemployment rate:** refers to those people who have been registering for work for more than twelve months. The long-term unemployment rate is calculated by working out the percentage of the long-term unemployed under Part 1 within the labour force.
- **Unemployment rate of persons aged 45+:** refers to the unemployment rate of persons aged 45 and over. The unemployment rate is arrived at by taking into account the number of unemployed aged 45+ registering under Part 1 as a percentage of the sum of the full-time gainfully occupied population and registered unemployed within the specific age-bracket.
- **Unemployment rate of persons aged under 25:** refers to the unemployment rate of persons aged less than 25. The unemployment rate is arrived at by taking into account the number of unemployed aged less than 25 registering under Part 1 as a percentage of the sum of the full-time gainfully occupied population and registered unemployed within the specific age-bracket.
- **Part 1 of the unemployment register:** those registering under Part 1 are either new job seekers who have left school, or re-entrants into the labour market, or job losers who have been made redundant by their former employers.
- **Part 2 of the unemployment register:** those registering under Part 2 are either workers who have been dismissed from work due to disciplinary action, left work of their own free will, refused work or training opportunities or were struck off the register after an inspection by the Law Enforcement personnel.
- The **Labour Supply/Labour Force:** includes both the registered unemployed and the full-time gainfully occupied population.
