

Provisional data indicate that the industrial producer price index in January decreased by 1.34 per cent over the previous month.

Industrial Producer Price Indices: January 2015

Cut-off date:
19 February 2015

Monthly comparison

During January, the producer price index for total industry decreased by 1.34 per cent over December 2014, to 97.03 points. Prices for intermediate goods decreased by 2.96 per cent, while consumer goods increased by 0.02 per cent. Energy and capital goods prices remained constant.

Prices within the domestic market increased by 0.13 per cent. This was due to increases within the consumer goods and intermediate goods sectors of 0.25 per cent and 0.17 per cent respectively.

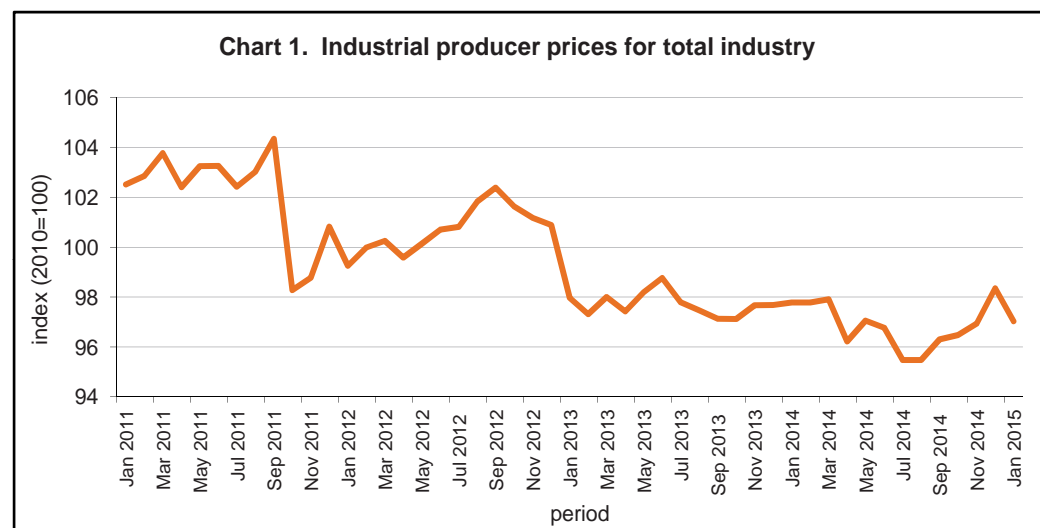

Prices for the non-domestic market decreased by 2.37 per cent reflecting drops of 2.73 per cent in respect of the non-euro area and of 1.75 per cent for the euro area.

Annual comparison

On an annual basis, the industrial producer price index went down by 0.77 per cent. The downturn resulted from price decreases in energy (-6.98 per cent), intermediate goods (-0.50 per cent) and capital goods (-0.05 per cent). Prices for consumer goods, however, rose by 1.38 per cent over January last year.

Producer prices for the domestic market decreased by 2.28 per cent, mainly on account of drops in energy prices (-6.98 per cent), intermediate goods (-1.36 per cent) and capital goods (-0.06 per cent). In contrast, a price increase was recorded in consumer goods (1.05 per cent).

Non-domestic prices were higher by 0.35 per cent, on account of increases of 0.53 per cent and 0.03 per cent within the non-euro area and euro area respectively ■

The calculation of growth rates from the indices table may differ slightly from the published growth rates, due to rounding.

Methodological Notes

1. The industrial producer price index monitors the changes in selling prices of all leading products within a sample of 83 large enterprises which account for over 80 per cent of the total industrial turnover.
2. Figures for the last three months are to be considered provisional and subject to revision. However, in exceptional cases, back data may also be revised. The figures in this news release are unadjusted.
3. The pricing point for the monthly price collection is the 15th day of the month or the nearest trading day prior to that date.
4. The methodologies and guidelines used are set by Eurostat and the International Monetary Fund (IMF).
5. For the purpose of calculating the euro area export figures, only transactions between enterprises in countries within the euro area were considered. The euro area includes Austria, Belgium, Cyprus, Estonia (from 2011), Finland, France, Germany, Greece, Ireland, Italy, Latvia (from 2014), Lithuania (from 2015), Luxembourg, the Netherlands, Portugal, Slovakia, Slovenia, and Spain. Transactions between resident enterprises are considered "domestic".
6. The objective of Main Industrial Groupings (MIGs) is to provide an activity breakdown of industry using the internationally recognised classification of economic activities (NACE Rev. 2 Sections B, C, D and E) in terms of demand-based products: intermediate goods, energy, capital goods, durable consumer goods, and non-durable consumer goods. These regroup NACE Sections B to E and cover the following economic activities: quarrying, manufacturing, water and energy sectors.
