

In May 2015, registered full-time employment increased by 4.2 per cent when compared to the corresponding month of the previous year, while registered part-time employment as a primary job rose by 3.9 per cent.

Gainfully Occupied Population: May 2015

Administrative data provided by the ETC show that over a period of one year, the labour supply (excluding part-timers) increased by 2.9 per cent, reaching 174,437. This was mainly attributed to an increase in the full-time gainfully occupied population (6,804) and a drop in registered unemployment (1,808) (Table 1).

Registered full-time employment

In May, administrative and support service activities (NACE 77-82) contributed mostly to the increase in employment, compared to May 2014 (Table 1). This change is partly influenced by shifts in employment from NACE 35 to NACE 78 as explained in note 9 of the methodological notes. Registered full-time employment in the private sector went up by 6,421 persons to 125,087. Public sector full-time employment increased by 383 persons to 44,017 (Table 2).

Persons registered as full-time self-employed rose by 630 when compared to May 2014, while persons registered as employees increased by 6,174. Full-time employment for males and females went up by 3.2 per cent and 5.9 per cent respectively over 2014 levels (Table 2).

Registered part-time employment

Registered part-time employment in May 2015 went up by 4.7 per cent when compared to a year earlier. The sectors that contributed most to the overall increase were wholesale and retail trade, repair of motor vehicles (NACE 45-47, 389 persons) followed by public administration and defence, compulsory social security (NACE 84, 293 persons) (Table 3).

Part-timers who also held a full-time job amounted to 23,609, up by 6.0 per cent when compared to the corresponding month in 2014. Employed persons whose part-time job was their primary occupation totalled 34,400, up by 3.9 per cent or 1,276 persons when compared to 2014 (Table 4) ■

Methodological Notes

1. The scope of this release is to carry out updates to administrative records resulting from late submissions to engagement and termination forms and the updating of employment records following the cleaning exercise undertaken by the ETC. The data provided in this release, including the relevant classifications, is based on administrative records held at the Employment and Training Corporation (ETC).
2. The information contained in this release may be subject to revision. Monthly data is revised in the subsequent year.
3. Full-time and part-time status is determined by the employer's declaration (or that made by a self-employed person) in the engagement form which is required to be sent to the ETC upon commencement of employment.
4. Apprentices are included under their respective economic activity.
5. **Definitions:**
 - **Labour Supply:** Full-time gainfully occupied population and the registered unemployed population.
 - **Apprentices, trainees and students:** Includes apprentices, trainees, Junior College and University students in the summer work-phase, undergraduate trainees, and trainees with fixed contracts.
 - **Regional employment:** Data on Malta/Gozo employment differs on the basis of economic sector. Accordingly, the data of the private sector depends on employee residence, whereas the data of the public sector depends on employer information of location of its employees.
 - **Full-time equivalent (FTE):** Employment in full-time equivalent is a conversion method used to measure the number of employees according to the number of hours worked. When using FTE a full-time employee working a 40 hour week is equivalent to 1.0, whereas a person who works 20 hours per week is equivalent to 0.5. Table 2 of this release includes persons who work full-time, persons on a full-time with reduced hours basis and full-time employees who are on unpaid leave. When converting these figures into FTE, full-time employees are considered as 1 whereas persons working full-time with reduced hours or who are on unpaid leave are considered according to the hours worked. FTE data is currently available in respect of public sector employment and is based on the administrative records of the Public Administration and Human Resources Office (PAHRO) within the Office of the Prime Minister. FTE information for the private sector is not available.
 - **Part 1 of the unemployment register:** Persons registering under Part 1 are either new job seekers who have left school, re-entrants into the labour market, or individuals who have been made redundant by their former employer.
 - **Part 2 of the unemployment register:** Persons registering under Part 2 are either workers who have been dismissed from work due to disciplinary action, left work out of their own free will, refused work or training opportunities or were struck off the register after an inspection by the Law Enforcement personnel.
6. Gainfully occupied population data for January-July 2013 includes ex-MRRA workers under construction (NACE 41-43). Following changes in ministerial responsibilities, these workers were shifted to a new Ministry with a different economic activity, namely public administration and defence; compulsory social security (NACE 84). As a result, there was a change in the way this group of employees was considered for statistical purposes in the course of 2013, resulting in a break in comparability in the time series within these areas of economic activity.
7. In 2015 ETC adopted a revision in the economic activity classification of government entities, departments and ministries in collaboration with PAHRO. This implies that from January 2015 the economic activity of public sector entities and units is assigned according to the true activity of the unit and not according to the economic activity of the Ministry under which each unit is attached.
8. During the course of 2014 persons working with the public transport operator were shifted from the private sector to the public sector. Prior to 2014 and as from January 2015, those persons were considered to be part of the private sector.
9. Public sector employees working in the economic activity: electricity, gas, steam and air conditioning supply (NACE 35) have been reclassified to employment activities (NACE 78). In view of this reclassification, there was a shift in employment figures from the economic activity aggregate 'electricity, gas, steam and air conditioning supply' to the 'administrative and support service activities' aggregate. In line with other releases published by this Office, this reclassification was taken on board from August 2014 onwards.
10. With regard to employment in the public sector, users are strongly advised to taken into account the shifts referred to in notes 6, 7, 8 and 9 when analysing data longitudinally.
