

25 February 2016 | 1100 hrs | 034/2016

Provisional data indicate that the industrial producer price index in January 2016 increased by 0.03 per cent when compared to the previous month.

Industrial Producer Price Indices: January 2016

Cut-off date:
19 February 2016

Monthly comparison

During January, the producer price index for total industry rose by 0.03 per cent and reached 95.54 points (Table 1). Prices for capital and intermediate goods increased by 0.15 and 0.09 per cent respectively. Mitigating this increase was a drop of 0.05 per cent in the prices of the consumer goods sector. Energy prices remained constant.

Domestic market prices increased by 0.10 per cent. This was due to an increase in prices within the capital, intermediate and consumer goods sectors, by 0.43, 0.20 and 0.01 per cent respectively.

Prices for the total non-domestic market remained static. However, prices within the non-euro area increased by 0.04 per cent while a decrease of 0.09 per cent within the euro area was registered (Table 2).

Annual comparison

On an annual basis, the industrial producer price index went down by 2.10 per cent when compared to 2015. The downturn resulted from price decreases in energy (14.02 per cent) and intermediate goods (1.63 per cent). On the other hand, prices within capital and consumer goods rose by 1.41 and 0.88 per cent respectively.

Producer prices for the domestic market decreased by 3.18 per cent, mainly on account of a drop in prices for energy (14.02 per cent). Price increases were recorded in capital goods (2.78 per cent), intermediate goods (2.42 per cent) and consumer goods (1.02 per cent).

Non-domestic prices declined by 1.28 per cent, resulting from decreases of 1.68 per cent and 1.05 per cent within the euro and the non-euro area respectively (Table 3) ■

Note: The calculation of growth rates from the indices table may differ slightly from the published growth rates, due to rounding.

Methodological Notes

1. The industrial producer price index monitors the changes in selling prices of all leading products within a sample of 83 large enterprises which account for over 80 per cent of the total industrial turnover.
2. The pricing point for the monthly price collection is the 15th day of the month or the nearest trading day prior to that date.
3. The methodologies and guidelines used are set by Eurostat and the International Monetary Fund (IMF).
4. For the purpose of calculating the euro area export figures, only transactions between enterprises in countries within the euro area are considered domestic. The euro area includes Austria, Belgium, Cyprus, Estonia (from 2011), Finland, France, Germany, Greece, Ireland, Italy, Latvia (from 2014), Lithuania (from 2015), Luxembourg, the Netherlands, Portugal, Slovakia, Slovenia, and Spain. Transactions among resident enterprises are considered "domestic".
5. The objective of Main Industrial Groupings (MIGs) is to provide an activity breakdown of industry using the internationally recognised classification of economic activities (NACE Rev. 2 Sections B, C, D and E) in terms of demand-based products: intermediate goods, energy, capital goods, durable consumer goods, and non-durable consumer goods. These regroup NACE Sections B to E and cover the following economic activities: quarrying, manufacturing, water and energy sectors.
6. Figures for the last three months are to be considered provisional and subject to revision. However, in exceptional cases, back data may also be revised.
7. The figures in this news release are unadjusted.
