

During November this year, the industrial producer price index registered a decrease of 1.08 per cent when compared to the corresponding month last year.

Industrial Producer Price Indices: November 2016

Cut-off date:
14 December 2016

Annual comparison

When compared to the month of November last year, the industrial producer price index went down by 1.08 per cent. This was due to a drop of 2.10 per cent in the prices within the consumer goods category and by 1.04 per cent within intermediate goods. This was mitigated by an increase of 0.50 per cent in capital goods. No price changes occurred in the energy sector.

Producer prices for the domestic market increased by 0.22 per cent. Price increases were recorded in the consumer goods (0.98 per cent) and capital goods (0.43 per cent) categories. However, this was mitigated by a decrease of 0.60 per cent in the intermediate goods grouping.

Non-domestic prices fell by 1.99 per cent due to decreases of 2.17 per cent within the euro area and 1.89 per cent within the non-euro area (Table 2).

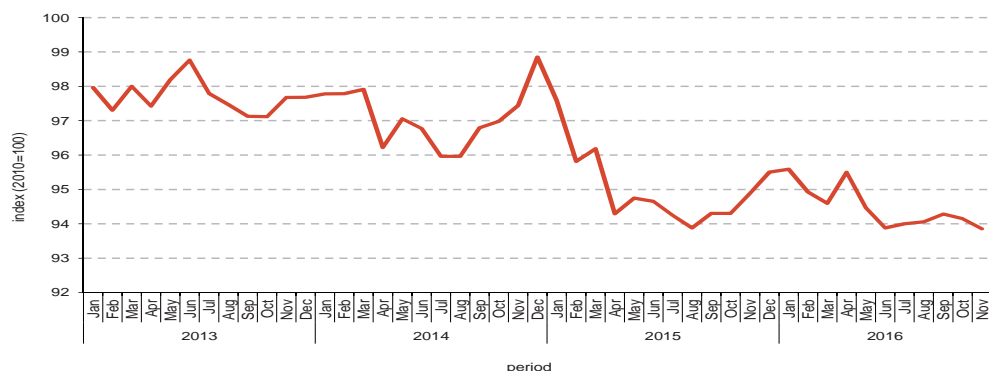

Monthly comparison

During the month under review, the producer price index for total industry declined by 0.31 per cent over that recorded in October this year mainly due to a drop in the prices for intermediate goods (0.80 per cent). On the contrary, prices for consumer and capital goods increased by 0.14 and 0.02 per cent respectively. No changes were registered in the prices for the energy sector.

Domestic market prices rose by 0.08 per cent due to an increase of 0.23 per cent within consumer goods. No variation was registered in the other categories.

Prices for the non-domestic market decreased by 0.59 per cent. This was due to a decline of 0.69 per cent in the prices within the non-euro area and by 0.42 per cent within the euro area (Table 3) ■

Note: The calculation of growth rates from the indices table may differ slightly from the published growth rates, due to rounding.

Methodological Notes

1. The industrial producer price index monitors the changes in selling prices of all leading products within a sample of 83 large enterprises which account for over 80 per cent of the total industrial turnover.
2. The pricing point for the monthly price collection is the 15th day of the month or the nearest trading day prior to that date.
3. The methodologies and guidelines used are set by Eurostat and the International Monetary Fund (IMF).
4. For the purpose of calculating the euro area export figures, only transactions between enterprises in countries within the euro area are considered domestic. The euro area includes Austria, Belgium, Cyprus, Estonia (from 2011), Finland, France, Germany, Greece, Ireland, Italy, Latvia (from 2014), Lithuania (from 2015), Luxembourg, the Netherlands, Portugal, Slovakia, Slovenia, and Spain. Transactions among resident enterprises are considered "domestic".
5. The objective of Main Industrial Groupings (MIGs) is to provide an activity breakdown of industry using the internationally recognised classification of economic activities (NACE Rev. 2 Sections B, C, D and E) in terms of demand-based products: intermediate goods, energy, capital goods, durable consumer goods, and non-durable consumer goods. These regroup NACE Sections B to E and cover the following economic activities: quarrying, manufacturing, electricity and water.
6. Figures for the last three months are to be considered provisional and subject to revision. However, in exceptional cases, back data may also be revised.
7. The figures in this news release are unadjusted.
