

24 July 2019 | 1100 hrs | 118/2019

In June, the number of persons registering for work stood at 1,616 decreasing by 9.1 per cent when compared to the corresponding month in 2018.

Registered Unemployment: June 2019

Data provided by Jobsplus for June 2019 indicate a decline of 156 persons registering under Part I and a decrease of six among those registering under Part II of the unemployment register, when compared to the same month last year (Tables 5 and 8). Registered unemployed dropped among all age groups, with the exception of those aged less than 20 years and those aged between 25 and 29 years (Table 1).

Registrants for work decreased when compared to June 2018, irrespective of how long they had been registering for work. The largest decrease was recorded among persons who had been registering for more than one year (Table 2).

The number of persons with a disability who were registering for work decreased by 68 when compared to the previous year, reaching 214. Men accounted for 68.7 per cent of total registrants with a disability (Table 3).

The largest share of men and women on the unemployment register sought occupations as clerical support workers with 18.8 per cent and 39.3 per cent respectively (Table 4) ■

Methodological Notes

1. This news release provides data on the number of persons registering for work with Jobsplus.

The National Statistics Office publishes, on a quarterly basis, another set of statistics regarding unemployment based on the Labour Force Survey (LFS). When compiling LFS statistics, the NSO adopts the International Labour Organisation (ILO) definition, an internationally agreed definition on unemployment. This definition has also been adopted by Eurostat and is used by all EU Member States. More details regarding the methodology used for the compilation of unemployment statistics from the LFS may be found in quarterly LFS news releases.

Since Jobsplus records and LFS results measure two different facets of unemployment, the resulting figures are not comparable. Users are therefore cautioned that these two sets of statistics should not be used interchangeably.

2. As from the release published on 23 February 2016, annual average results are being worked out using a custom made application which takes into consideration more data points to work out the mean for the year. This approach may give rise to differences resulting from rounding.
3. Registered monthly unemployment rates will no longer be published on the official version of this release. These rates are found in the excel version of this news release: https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_C2/Labour_Market_Statistics/Pages/Registered-Unemployment.aspx. In April 2019, NSO plans to introduce a new set of EU-harmonised indicators on monthly unemployment based on European Labour Force Survey (EC 577/1998).
4. ISCO 08 is being used to classify occupations sought by the registered unemployed.

5. Definitions:

- **Registered unemployment rate:** refers to the number of registered unemployed persons both under Part I and Part II as a percentage of the sum of the full-time gainfully occupied population and the total registered unemployed.

In computing the registered unemployment rates for the purpose of this release, only the full-time gainfully occupied population is taken into consideration. Persons employed on a part-time basis are not taken into account in this computation.

Registered unemployment rates are not comparable with LFS unemployment rates due to different sources of data collection. While LFS rates are based on sample survey estimates, registered unemployment rates are based on Jobsplus data (registered unemployment data and registered full-time gainfully occupied).

- **Long-term registered unemployment rate:** refers to those people who have been registering for work for more than twelve months. The long-term unemployment rate is calculated by working out the number of the long-term unemployed under Part I as a percentage of the labour force.
- **Part I of the unemployment register:** those registering under Part I are either new job seekers who have left school, re-entrants into the labour market or individuals who have been made redundant by their former employers.
- **Part II of the unemployment register:** those registering under Part II are either workers who have been dismissed from work due to disciplinary action, left work out of their own free will, refused work or training opportunities or were struck off the register after an inspection by the Law Enforcement personnel.
- The **Labour Supply/Labour Force:** for the purpose of this release, the labour supply is the sum of the registered unemployed and the full-time gainfully occupied population (excluding part-time employment).

6. The data on unemployment levels is final and not normally subject to revision.
