

12 December 2019 | 1100 hrs | 202/2019

In July 2019, registered full-time employment increased by 5.4 per cent while part-time employment as a primary job increased by 1.0 per cent when compared to the corresponding month in 2018.

## Registered Employment: June and July 2019

Administrative data provided by Jobsplus show that, over a period of one year, the labour supply (excluding part-timers) in July increased by 5.2 per cent, reaching 221,029 (see methodological note 5). This was mainly attributed to a year on year increase in the full-time registered employment (11,185) and a decline in registered unemployment (174) (Table 1).

### Registered full-time employment

When July 2019 is compared to July 2018, the highest increase in employment was brought about by administrative and support service activities (NACE 77-82) and construction (NACE 41-43), with 1,701 and 1,694 respectively (Table 1). Registered full-time employment in the private sector went up by 10,484 persons to 171,209. Public sector full-time employment increased by 701 persons to 48,166 (Table 2).

The number of persons registered as full-time self-employed rose by 1,408 when compared to July 2018, while the number of persons registered as employees increased by 9,777. Full-time employment for males and females went up by 5.0 per cent and 6.0 per cent respectively over 2018 levels (Table 2).

### Registered part-time employment

Registered part-time employment in July 2019 went up by 4.5 per cent when compared to a year earlier. The overall increase was mainly generated by professional, scientific and technical activities (NACE 69-75, 819) and administrative and support services activities (NACE 77-82, 407). On the other hand, accommodation and food services activities (NACE 55-56) registered a drop of 551 persons when compared to July 2018 (Table 3).

The number of part-timers who also held a full-time job amounted to 30,213 up by 9.3 per cent when compared to the corresponding month in 2018. Employed persons whose part-time job was their primary occupation totalled 38,026, up by 1.0 per cent when compared to 2018 (Table 4) ■

<sup>1</sup> Refer to methodological note 6

## Methodological Notes

1. The data provided in this release, including the relevant classifications, is based on administrative records held at Jobsplus. The information contained in this release may be subject to revision. Monthly data is revised in the subsequent year.
2. The National Statistics Office publishes, on a quarterly basis, another set of statistics on employment and unemployment based on the Labour Force Survey (LFS). When compiling LFS statistics, the NSO adopts the International Labour Organisation (ILO) definition, an internationally agreed definition on employment and unemployment. This definition has also been adopted by Eurostat and is used by all EU Member States. More details regarding the methodology used for the compilation of employment and unemployment statistics from the LFS may be found in quarterly LFS news releases.

Since Jobsplus records and LFS results measure two different facets of employment and unemployment, these are not comparable. Users are therefore cautioned that these two sets of statistics should not be used interchangeably.

3. Full-time and part-time status is determined by the employer's declaration (or that made by a self-employed person) in the engagement form which is required to be sent to Jobsplus upon commencement of employment.
4. Apprentices are included under their respective economic activity.

### 5. Definitions:

- **Labour Supply:** Full-time gainfully occupied population and the registered unemployed population.
  - **Apprentices, trainees and students:** Includes apprentices, trainees, Junior College and University students in the summer work-phase, undergraduate trainees, and trainees with fixed contracts.
  - **Regional employment:** Data on Malta/Gozo employment differs on the basis of economic sector. Accordingly, the data on private sector employment depends on employee residence, whereas data for public sector depends on employer information on the location of its employees.
  - **Full-time equivalent (FTE):** Employment in full-time equivalent is a conversion method used to measure the number of employees according to the number of hours worked. When using FTE a full-time employee working a 40-hour week is equivalent to 1.0, whereas a person who works 20 hours per week is equivalent to 0.5. Table 2 of this release includes persons who work full-time, persons on a full-time with reduced hours basis and full-time employees who are on unpaid leave. When converting these figures into FTE, full-time employees are considered as 1 whereas persons working full-time with reduced hours or who are on unpaid leave are considered according to the hours worked. FTE data is currently available in respect of public sector employment and is based on the administrative records of the People and Standards Division within the Office of the Prime Minister. FTE information for the private sector is not available.
  - **Part 1 of the unemployment register:** Persons registering under Part 1 are either new job seekers who have left school, re-entrants into the labour market, or individuals who have been made redundant by their former employer.
  - **Part 2 of the unemployment register:** Persons registering under Part 2 are either workers who have been dismissed from work due to disciplinary action, left work out of their own free will, refused work or training opportunities or were struck off the register after an inspection by Law Enforcement personnel.
6. Owing to a reclassification exercise carried out by Jobsplus, employers recruiting domestic workers for personal services, (not as a commercial activity), have been transferred from NACE divisions 86 and 88 to NACE division 97. Within the latter division, a household employer is defined as a person who pays an individual to perform duties in or around his home. Household employees may include nannies, care workers and private nurses. This change came into effect as from December 2017 and as such, affected also the average for that year.
