Note: "Reports come in on a fortnightly basis and for this reason the abnormal values are so, due to the fact that when a report overlaps to the next month even for one day, said report is considered to make part of the following month. This happens twice a year, hence, the abnormal values for 2009 happened in May and November, while for 2010 they happened in May and October."

11. All data in this News Release are in line with the European System of National and Regional Accounts (ESA 95) Manual (ISBN 92-827-7954-8). The European System of National and Regional Accounts (ESA) is an internationally compatible accounting framework for a systematic and detailed description of a total economy (whether this is a region, a country, or a group of countries), its components, and its relations with other total economies. The ESA is therefore not restricted to annual national accounting, but applies also to regional accounts. Regional accounts are a regional specification of the corresponding accounts of the total economy. The regional accounts make use of the concepts used for the accounts of the total economy.
12. The nomenclature of territorial units for statistics (NUTS) provides a single, uniform breakdown of the economic territory of the European Union. The NUTS is the territorial classification for the compilation of regional accounts. The economic territory of a country can be divided into regional territories and the extra-region territory. For the purpose of regional accounts, Malta is divided as follows:
The regional territory includes the region that is part of the geographic territory of a country and any free zones, including bonded warehouses and factories under customs control in the region. The extraregion territory is made up of parts of the economic territory of a country that cannot be attached directly to a single region.
13. Readers and users should be aware that all figures from 2004 onwards are provisional and subject to revision. Data on the Government Sector (S.13) is derived from the Departmental and Accounting System and financial statements of Extra-Budgetary Units and Local Councils. For the other sectors, extensive use was made of employment data by ETC, which was classified by A60 according to the region where the self-employed/employee were working, and not residing.
14. Employment (Table 3) includes full-time employees, part-time employees and self-employed translated into full-time equivalent. Data based on administrative records of ETC.
