### CHAPTER 1 - AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS

1.1	Distribution of agricultural employment by administrative area, age group and sex	3
1.2	Distribution of land declared by farmers by administrative area and type of land	4
1.3	Distribution of land declared by farmers by locality	5
1.4	Distribution of agricultural holdings by administrative area and size class of agricultural area (tumoli)	6
1.5	Distribution of agricultural holdings by administrative area and size class of agricultural area (ha)	6

### CHAPTER 2 - VINEYARDS

2.1	Distribution of area under vineyards (ha) and number of vines by administrative area	9
2.2	Percentage distribution of area under vineyards (ha) and number of vines by administrative area	10
2.3	Distribution of area under vineyards (ha) and number of vines by locality	11

### CHAPTER 3 - THE PIG INDUSTRY

3.1	Distribution of pig farms and pig population by administrative area	15
3.2	Distribution of pig population by administrative area and type of pig	16
3.3	Distribution of pig population by administrative area and size class of pigs	17
3.4	Distribution of breeding females by administrative area and size class of breeding sows	18
3.5	Distribution of pig population and pig farms by administrative area and size class of pigs	19
3.6	Annual distribution of pig population by type of pig and administrative area	20
3.7	Distribution of monthly pig slaughters (heads) by region	21
3.8	Distribution of monthly pig slaughters (carcass weight) by region	22

### CHAPTER 4 - THE CATTLE INDUSTRY

4.1	Distribution of cattle farms and cattle population by administrative area	25
4.2	Distribution of cattle population by administrative area, age and sex	26
4.3	Distribution of cattle population and cattle farms by administrative area and herd size of cattle	27
4.4	Distribution of cattle population by administrative area and herd size of cattle	28
4.5	Distribution of dairy cows by administrative area and size class of dairy cows	29
4.6	Annual distribution of cattle population by age of cattle and administrative area	30
4.7	Distribution of monthly cattle slaughters (heads) by region	31
4.8	Distribution of monthly cattle slaughters (carcass weight) by region	32

### CHAPTER 5 - SHEEP AND GOATS

5.1	Distribution of sheep and goats population by administrative area	35
5.2	Distribution of sheep population by administrative area and type of sheep	36
5.3	Distribution of goats population by administrative area and type of goat	37
5.4	Distribution of sheep population by administrative area and herd size of sheep	38
5.5	Distribution of goats population by administrative area and herd size of goats	39

### CHAPTER 6 - POULTRY

6.1	Distribution of poultry farms by administrative area and farm size (m <sup>2</sup> )	43
6.2	Distribution of poultry farms and current capacity (heads) by administrative area and size class of current capacity (heads)	44
6.3	Distribution of poultry farms by current capacity (heads) and farm size (m <sup>2</sup> )	45
6.4	Distribution of poultry population by administrative area and type of poultry	45

**CHAPTER 7 - OUTPUT OF THE AGRICULTURAL INDUSTRY**

7.1	Wholesale quantity of vegetables sold through official markets	49
7.2	Wholesale value of vegetables sold through official markets	50
7.3	Monthly wholesale quantity of vegetables sold through official markets 2004	51
7.4	Monthly wholesale value of vegetables sold through official markets 2004	52
7.5	Wholesale quantity of fruit sold through official markets	53
7.6	Wholesale value of fruit sold through official markets	54
7.7	Monthly wholesale quantity of fruit sold through official markets 2004	55
7.8	Monthly wholesale value of fruit sold through official markets 2004	56
7.9	Average wholesale prices of marketed fruit and vegetables	57
7.10	Total estimated output of fruit and vegetables	59
7.11	Total estimated value of fruit and vegetables at producer prices	61
7.12	Slaughtering quantity (carcass weight)	63
7.13	Monthly slaughtering quantity 2004 (carcass weight)	64
7.14	Slaughtering value of animals slaughtered at licensed slaughter houses	65
7.15	Monthly slaughtering value 2004	66
7.16	Estimated quantity of milk production	67
7.17	Estimated monthly egg production	68
7.18	Monthly milk intake	69

**CHAPTER 8 - AGRICULTURE INDICES**

8.1	Vegetables: Price Index	73
8.2	Fruit: Price Index	79
8.3	Vegetables: Volume Index	83
8.4	Fruit: Volume Index	89
8.5	Annual slaughtering production volume index (1995 = 100)	93
8.6	Monthly slaughtering volume index: January - December 2004 (1995 = 100)	94
8.7	Dairy milk intake volume index (1995 = 100)	95
8.8	Annual egg production volume index (1995 = 100)	96
8.9	Monthly and annual producer price indices for agricultural products - 2004 (2000 = 100)	97
8.10	Monthly and annual input price indices for agricultural products - 2004 (2000 = 100)	99

**CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

9.1	Net value added for agriculture: 2002-2004	103
9.2	Final production of the agricultural industry: 2004	104
9.3	Components of net value added at basic prices: 2002-2004	105
9.4	Components of gross agricultural production at producer prices by type of production and destination of product: 2004	106
9.5	Components of gross agricultural production at producer prices by destination of product: 2002-2004	107
9.6	Components of gross agricultural production at producer prices by type of production: 2002-2004	108
9.7	Components of intermediate consumption by type of intermediate consumption: 2002-2004	109

**CHAPTER 10 - SUPPLY BALANCE SHEETS**

10.1	Cereals	113
10.2	Rice	116
10.3	Dried pulses	119
10.4	Potatoes and potato starch	120
10.5	Oleaginous seeds and fruits	122
10.6	Vegetable fats and oils	125
10.7	Prepared fats and oils	128
10.8	Oil cakes	130
10.9	Sugar	132
10.10	Fruit and vegetables	133
10.11	Fruit and vegetables by species	135
10.12	Wine	138
10.13	Meat	141
10.14	Milk and milk products	143
10.15	Eggs: 2003-2004	147

**CHAPTER 11 - FISHERIES**

11.1	Vessel distribution by region	151
11.2	Vessel distribution by type in the Maltese Islands	151
11.3	Fishing fleet by type by region	152
11.4	Vessel distribution by type by length (m)	153
11.5	Vessels owned by full-time fishermen distribution by vessel type by length (m)	153
11.6	Value of fish landings at official market	154
11.7	Quantity of fish landings at official market	155

## List of Charts

8.1	Annual slaughtering production volume index	93
8.2	Monthly slaughtering volume index: January - December 2004	94
8.3	Dairy milk intake volume index	95
8.4	Annual egg production volume index	96

**CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

9.1	Percentage distribution of gross agricultural production by type of production: 2004	106
9.2	Percentage distribution of gross agricultural production by destination of product: 2004	107
9.3	Percentage distribution of gross agricultural production by type of production: 2002-2004	108
9.4	Percentage distribution of intermediate consumption by type of intermediate consumption: 2002-2004	109

## FOREWORD

Farming and fishing are two activities that are fundamental to the Maltese identity. Their importance runs deeper than the relatively small sectoral workforce and the 2.4-per-cent share of the national Gross Domestic Product. Yet, while connecting the indigenous population with its early roots, they are also modern industries, in that the changes and challenges facing the European farming sector extend to the Mediterranean too. Several factors make agriculture and fishing as special and indispensable today as they were in the days of our forefathers. They are a supply source of the local agri-food business and form a strong link in the fresh-food chain, contributing to the tourist industry and to health-conscious local consumers who are increasingly discerning as to what they place in their shopping trolleys. Crucially, the industries play a significant role in the upholding of the rustic and marine environment and the Mediterranean character of Malta and Gozo.

*Agriculture and Fisheries Statistics 2004* is this Office's annual instalment towards keeping faith with Malta's past while at the same time opening a window on the country's future. It incorporates detailed statistics on the sector for the reference year 2004. Chapter 1 comprises an overview of agricultural holdings and the sectoral workers. Chapter 2 sheds light on an interesting and thriving sub-industry - viticulture. Chapters 3 to 6 are dedicated to information on livestock, while Chapter 7 outlines the volume and value of marketed vegetables, fruit and animal products, including produce earmarked for export. Chapter 8 provides agricultural price indices which are used in the analysis of price developments over a series of years, while Chapters 9 to 10 present economic accounting data for the agricultural sector. The publication concludes with a profile of the fishing industry, providing details on the local fishing fleet and fish landings at the official market.

Writing this preface accords me the opportunity to reflect that this annual publication is into its fifth edition. When one considers that the agriculture and fisheries statistical programme within the National Statistics Office was reborn in the late 1990s in the wake of a long dormancy, this fact gives me considerable satisfaction. I must not omit to mention the full Census of Agriculture carried out in 2001, which provided an extensive stock take of arable land, agricultural production, livestock, the workforce in this sector and agricultural equipment and machinery. The Unit's output also includes a number of monthly and quarterly statistical updates relating to farm produce and fisheries, as well as the carrying-out of a good crop of sub-sectoral surveys. All in all, the following collection of statistical information is a tangible measure of this particular sector in the reference year and constitutes, I believe, a useful addition to the literature in this area.

Alfred Camilleri  
Director-General  
May 2006

## **COMMENTARY**

### **INTRODUCTION**

Reliable statistics are the medium to gauge the behavior of an activity over a period of years. This is the fifth consecutive year that the National Statistics Office is publishing a set of Agricultural tables. The first set was presented in a hard copy, however, with the environmental policy, it has been decided to discontinue hard copies and publish in electronic format.

### **CHAPTER 1 - AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS**

The data in this chapter is based on the Agricultural Census which was carried out in October 2001. Table 1.1 refers to all agricultural workers who were engaged in any agricultural activity during the full year prior to the Census date. On the other hand, the agricultural land area refers to 1<sup>st</sup> October, 2001 – census date.

Table 1.2 refers to agricultural land area used by the holding for agricultural production. The term 'Dry Land' refers to agricultural land area which depends on the rainy season. Only one crop in a calendar year is grown on 'dry' land. 'Irrigated land' is the agricultural land area on which the crop can be irrigated all the year round and the land has continuous supply of water, all the year round, irrespective of whether it has a natural spring, served by second class water or water supplied by any other source. It is normal practice that on 'irrigated land', more than one crop cycle is grown during the period of one year. 'Garage land' is land belonging to the holding but has no agricultural value because of the scarcity of the soil or is rocky in nature.

Although recent surveys have been carried out, namely the FSS 2003, this does not give detailed data by local council.

### **CHAPTER 2 - VINEYARDS**

The data in this chapter is compiled from the Viticulture section of the Ministry of Rural Affairs and the Environment. A register of all parcels is kept at the Ministry and all holdings are obliged, by legislation, to register all new plantations and all grubbing which is carried out from time to time.

All tables refer to land area under vines classified by the residence of the holder. Table 2.1 refers to the total area under vines and the number of vines on NUTS level 4 classification. Table 2.2 refers to the total percentage distribution of vineyards by Nuts 4 classification.

### **CHAPTER 3 - PIG INDUSTRY**

A census to determine the number of heads in the pig industry was carried out at the end of the year 2004. The census date was, 1<sup>st</sup> December, 2004. A postal questionnaire was sent to all holdings which are licensed to operate in the sector. No thresholds were used. Non-respondents were contacted by telephone and at the end, a response rate of 98 per cent was registered, with the remaining 2 per cent were imputed from previous surveys. All data collected was counter checked with previous surveys collected by the NSO. Data for slaughtering statistics is compiled from the official data which is supplied on a monthly basis, by the Veterinary Services.

## **CHAPTER 4 - CATTLE INDUSTRY**

A census, with a reference date of 1<sup>st</sup> December, 2004, was held among herdsmen at the end of the year 2004. The livestock industry is controlled by the Veterinary Services. While it is imperative to have an operating license, a livestock register is maintained by the same body.

As with the pig census, the same methods were used in the compilation of the cattle population. A postal questionnaire was mailed to all holdings, irrespective of the number of heads on the farm, and non respondents were followed up by telephone. The results shown in the tables of this chapter are made up of 95 per cent response rate and a 5 per cent imputation from previous surveys.

Slaughtering data are compiled on a monthly basis from returns submitted to the NSO from the Veterinary Services Department, from the official records kept at the slaughterhouses.

## **CHAPTER 5 - SHEEP AND GOATS**

A sample survey for Sheep and goat census was carried out at the end of 2004, with a census date being 1<sup>st</sup> December. The Ministry of Agriculture provided a full list of sheep and goat breeders which is kept at the Food and Veterinary Regulation Division. No thresholds were applied and all breeders were provided with a postal questionnaire. A response rate of 88.7 per cent was achieved.

Rearing of sheep and goats is mainly intended for the production of cheese. As a backyard industry, sheep and goats are not normally slaughtered at the civil abattoir, however, annual estimates within the Economic Accounts for Agriculture are provided. Only a minimal amount of sheep and goats are slaughtered at the civil abattoir.

## **CHAPTER 6 - POULTRY**

A comprehensive Poultry Census was carried out at the end of 2002, census date being 1st September, 2002. All farms which were licensed to operate were covered by the census. The list of holdings licensed to operate within this sector was provided by the Food and Veterinary Regulation Division .

Poultry farms specializing in the broiler production operate on a cycle system. On average, five cycles of production are carried out annually, with a resting period of four weeks between one cycle and the other. Some farms were found to be in their resting period during the census.

## **CHAPTER 7 - OUTPUT OF THE AGRICULTURAL INDUSTRY**

Tables 7.1 to 7.8 refer to the total wholesale quantities and values of the agricultural produce that passes through the official markets. The average wholesale prices of marketed fruit and vegetables which are shown in table 7.9 are the total annual unit price per kilogram.

The estimated volume and value of agricultural produce shown in tables 7.10 and 7.11 refer to the official marketing data, together with a provision for direct sales to the consumer, direct sales to industry, potato export and farm consumption. Purchases of tomatoes and grapes are compiled by the NSO from returns submitted by the industry itself. The volume and value of potato export, which is monitored by the Ministry of Agriculture, is submitted to the NSO on a yearly basis.

Whilst livestock slaughtering data is provided to the NSO by the Veterinary Services, data for poultry slaughtering is compiled, through monthly returns, by the Agriculture and Fisheries Unit at the NSO.

## **CHAPTER 8 - AGRICULTURE INDICES**

Agriculture price indices are used in relation with the analysis of price developments over a number of years. The field of observation of a price index covers all goods and services for which it is desired to measure price trends. The selling prices of agricultural products and the purchase prices of the means of agricultural production provide information on trends on prices.

The agricultural price indices on specific sectors have been compiled since 1995. The prices are obtained from official markets of fruit and vegetables, the department of Veterinary Services and the dairy plant.

The 'producer price index' for agricultural products (Table 8.9) is a similar index that uses the same sources for information but provides a level of indices on a broader level. This type of index was introduced in the year 2000. The producer price is the price received by the farmer without deducting taxes and without the inclusion of subsidies. The 'Input Price Index' (Table 8.10) measures trends in purchase prices of certain goods and products used to produce agricultural products. Both these indices have been compiled with a base year 2000.

The 'Producer Price Index' relates to sales of agricultural produce outside the agricultural industry, while sales of agricultural produce to other agricultural units are not taken into consideration. This concept is known as the 'National Farm Concept'

## **CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

The Economic Accounts for Agriculture is a unique source of information that provides the analysis of the production process and the incomes generated by it. The Net Value Added is the gauge which policy makers monitor trends in the agricultural sector and also make comparisons of income generated by the agricultural industry with other sectors of the economy.

The Economic Accounts are based on the European System of Integrated Economic Accounts (ESA) was compiled in 1999 and this publication has Economic Accounts for Agriculture for the years 2002, 2003 and 2004.

The production account can be split into two parts. Total output of agriculture, which was compiled using statistical data from:-

- Official markets
- Department of Veterinary Services
- Dairy industry
- Extensive surveys carried out by the NSO
- Other Administrative sources and expert estimates

The input side was compiled using:-

- Trade Data
- Business Statistics
- Extensive surveys carried out by the NSO
- Other administrative sources and expert estimates

The Net Value Added is the difference between total Output and Intermediate Consumption after providing for Consumption of Fixed Capital. The net value added is the summation of all the returns to all the factors of production within the agricultural sector.

## **CHAPTER 10 - SUPPLY BALANCE SHEETS**

A supply balance sheet presents a comprehensive picture of the pattern of a country's supply during a specified reference period. The total quantity of a commodity produced in a country, added to the total quantity imported and adjusted to any change in stocks that may have occurred since the beginning of the reference period, gives the supply available during that period.

A set of Supply Balance Sheets of agricultural commodities are being published from the period 2001/2002. The trade data for the compilation of the supply balance sheets is compiled by the International Trade Data Section of the NSO, through customs documents. Production data for the different commodities is compiled using administrative data, data compiled by the Agriculture and Fisheries unit and expert estimates.

The trade data in the balance sheets is being compiled from the Comext database, hence, past data may have been revised.

## **CHAPTER 11 - FISHERIES**

The source of the data appearing in this chapter is derived from administrative registers kept at the National Aquaculture Centre at the Ministry of Rural Development and Environment. The update of the data is an ongoing process and the MaltaStat Fishing Vessel database was established in collaboration with FAO.

According to the fisheries regulations, fish caught by local fishermen have to be sold through the wholesale Fish market. Catches are sold by public auction through a middleman and all dealers are registered with the Fisheries Department.

Statistical data for fish landings is collected through the official daily returns of fish landings and compiled on a monthly basis.

# **Chapter 1 - Agricultural Land, Labour Force and Holdings**

Based on Census of Agriculture carried out in 2001

1.1. Distribution of agricultural employment by administrative area, age group and sex
